CEO MESSAGE

I am Proud to serve as the CEO OF **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS**

the excellence we have reached over the past years is because of :

- we truly Understand the needs of our clients

High quality , low quality , low cost , timely completion and safety records are always primary

- success is not only looking into the future but also to believe it's essential to occasionally look into our past from were we began

We Should not expect to stay pioneers in our buisness unless we measure the growth of our past as well as to take the necessary and appropriate actions to meet the needs of the society and our clients and to keep up with giant development plan that has been adopted by the suadi government (Saudi Version) 

The development ,support , trust and dedication of our loyal staff are the elements that combine to make **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** a winning team.
I ask allah to grant us with his blessing

Your Sincerely,
Eng.M.Firas Alsamman
(CEO)

INTRODUCTION

Based on many years of experience and knowledge of its management and the development potential level of its employees **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** is a solid establishment specialized for contracting in building, electrical, mechanical, road, water, and sanitary works.

And according to the **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** was able to triple the volume of its business during the past few years and now striving to the implement another expansion plan to double the volume of its business again

We are the second generation of this business that started by **Eng.Yahya Al Samman since 1973** and now we have a management contract with **SAMMAN GROUP** in Istanbul, Turkey.

To achieve this goal **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** is generously investing in its human resources in addition to its financial capabilities

FIRE TRIANGLE

FIRE DAMPERS

OVERVIEW

SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS

- is a leading manufacturer of a complete line of air distribution products, dedicated to provide the best service for HVAC market. since it was founded in 1973, SAMMAN EsT. has expanded its products for use in residential , commercial, industrial, and institutional buildings.
- controls the quality of each product at every stage of the manufacturing process qualified quality control staffs are in charge of maintaining a level of quality that meets the highest standards . being a leaders in manufacturing of air distribution products , based on long experience and proficiency of its highly motivated staff,
- provide the best solution for all kinds of HVAC inquiries
- manufactured true a wide range of products like rectangular Ducts , Spiral Ducts, Volume control Dampers, Fire Dampers and sound Attenuators. its products performance has been tested and certified at renowned laboratories and test facilities, as well as having been proven in a large number of installation and under all types of operating condition
- has equipped itself to expand its sales operation and manufacturing capabilities to cover the markets of the middle East , Asia and Europe.

STRATEGIC GOALS

move from commodities to brands :

to beat the industry trend in a situation of over supply we need to move away from selling commodities by converting them into brands

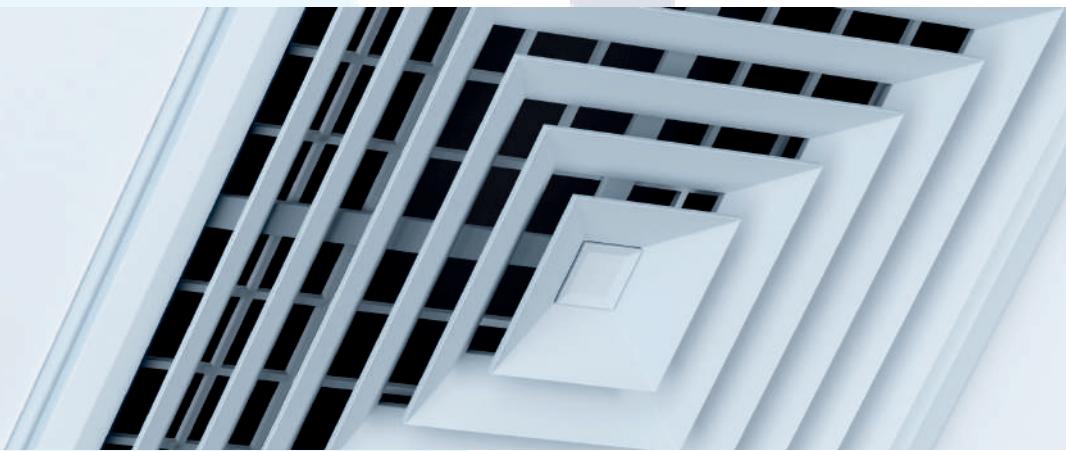

value creating partnership with customer and supplier:

we recognize the value of partnerships And so do our customer and suppliers Whom we have helped grow in the past.

inspired and happy employees:

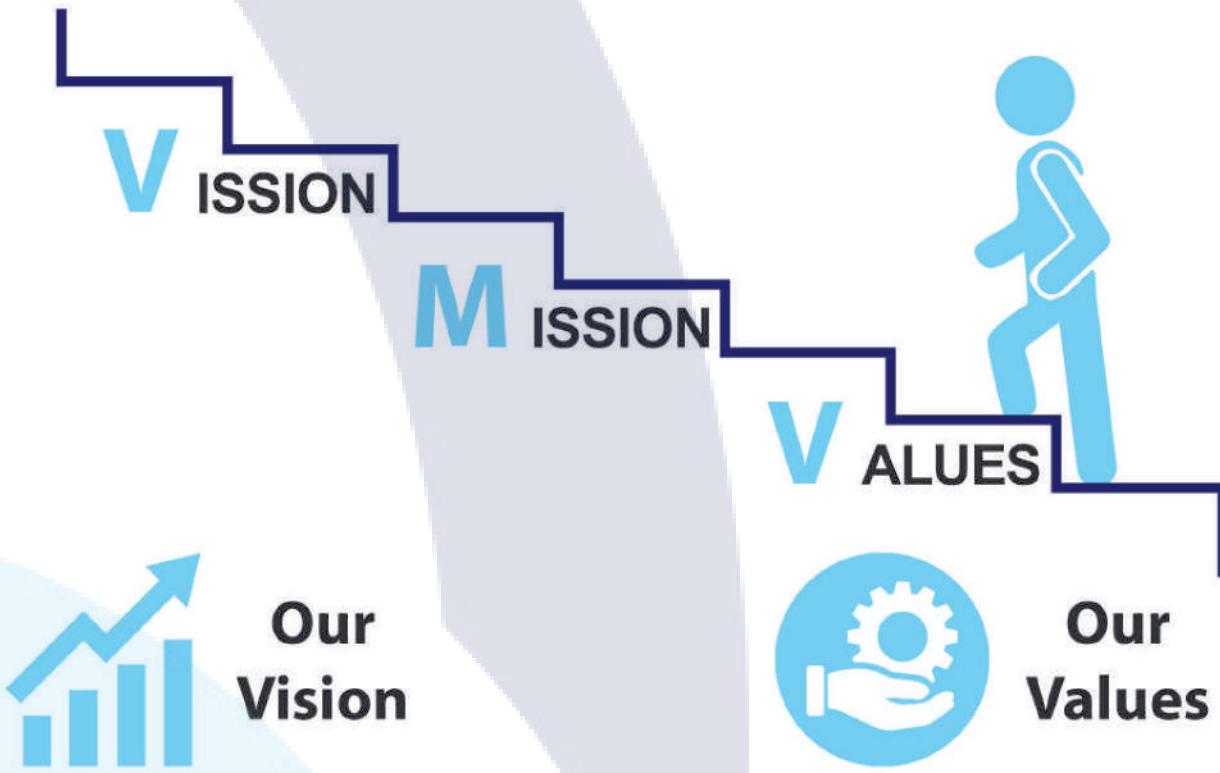

A lot is dependent on the individual spirit and enthusiasm or the employees to realize our vision.

we will accelerate our efforts to provide a work environment that ensure a sense of purpose and personal growth for each individual.

continue to be lowest cost producer. The world outside is, however, changing fast and lowest cost status is constantly under threat from new technologies, cost escalation of raw materials inputs , energy and labor.

OUR VISION,MISSION & VALUES

We are striving to be one of the best in the construction field including civil, architectural and electromechanical works for industrial, commercial, Service buildings and roads in the Middle East.

Our Mission

Provide customers with the best service by implementing projects with best quality and lower cost.

Our mission has been known through what we set out to do each day.

SAMMAN'S ethics lead everything we do. Incorporating these core values in our daily work, and making them an integral part of our culture, is the guarantee to our future success. Our Values decides who we are and what we believe.

- Strict commitment to Quality, Safety and a Healthy environment
- An open relationship with our clients and employees based on mutual trust, Respect and success.
- Transparency, accountability and integrity in all we do.

OUR VISION,MISSION & VALUES

The main sections and activities that contributed in our success are:

- **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** (Duct and air distribution system).
- SAMMAN for decor and wood work.
- Assembling control panel board.
- A planning division to make reachable goals.
- A quality control division to monitor the achievement of each plan.
- Using the latest technology and information transfer to communicate between all departments and employees with the management.
- The establishment is in process to add a partner that will make an addition And an advantage to the structure, capital and volume of its business.

Employees

One of the main reasons that made **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** what it is today, is attracting the talented Human resources, develop and maintain them.

Alot of events are organized to keep the relations between all employees not just for work, such as football matches, trips, Ramadan breakfasts.

In their gladness and grief we stand with them.

ABOUT US

SAMMAN QUALITY POLICY

SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS QUALITY POLICY

SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS objective is to be the leading manufacturer and steel & wooden products and new technologies in the processes.

The implementation of the internal procedures which constitute our policy insures that our products and services will comply with and satisfy the business requirements and needs of our Customers.

- We strive for continuous improvement and development of products and services to meet the challenging needs and demands of our customers in a timely manner.
- We are committed to achieve total customer satisfaction by being diversified, flexible and efficient.
- Our success is derived from the success of our Customers. We seek continuous improvement of internal processes to meet the ever-growing demands of today's and future markets.
- We do not compromise safety. The safety of the employees and customers is the corner stone of our operation.
- We coach our employees to be the best in their field. We make them aware of our policies, train them and consequently reward them for being innovative and self-motivated.
- We promote our products and services to our customers through highly qualified personnel. Our growth is based on the growth of our personnel.
- We are not afraid to change and accept feed back from our customers. Market feedback is the driving force behind our success.
- We are committed to continuously monitor and improve the quality system by adopting and implementing a Quality Management System according to the requirements of ISO9001: 2008.

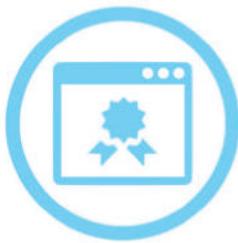

Eng. Tamer Bashouri
Factory Manager

ABOUT US

SAMMAN QUALITY POLICY

QUALITY POLICY

To provide competitive products and services conforming to customer needs and expectations first time, on time, every time. Consistent with group purpose, **SAMMAN FACTORY FOR AIR DISTRIBUTION SYSTEMS** shall constantly strive to improve the quality of life of the communities it serves through excellence in all facets of its activities.

We are committed to creating value by continually improving our system and process through Innovation, involving all our employees. This policy shall from the basis of establishing and reviewing to align with business direction and to comply with all the requirements of the Quality Management Standard.

QUALITY OBJECTIVES

To enhance company's ability to consistently meet our customer's needs, by improving organizational and Team effectiveness.

PRODUCT CONFORMANCE

We strive for conformance of products to standards.

DELIVERIES:

Deliveries are made as per production Schedules and plannings.

SAMMAN QUALITY POLICY

Certificate of Registration

This certificate has been awarded to

M. U. AL SAMMAN FOR STEEL PRODUCTS

P.O Box 132934, Jeddah 21382, Kingdom of Saudi Arabia

in recognition of the organization's Quality Management System which complies with

ISO 9001:2008

The scope of activities covered by this certificate is defined below

Manufacturing of Air Ducts and HVAC Accessories

Certificate Number:

68694/A/0001/UK/En

Issue No:

1

Date of Issue: (Original)

31 March 2015

Expiry Date:

30 March 2018

Date of Issue:

31 March 2015

Issued by:

On behalf of the Scheme Manager

If there is any doubt as to the authenticity of this certificate, please do not hesitate to contact the Head Office of the Group on info@urs-certification.com
URS is a member of United Registrar of Systems (Holdings) Ltd, Washington House, 3 Durley Road, Bournemouth, BH2 5JQ, UK. Company Registration no. 5236468.

QUALITY ASSURANCE (RAW MATERIAL , IN-PROCESS & FINAL PRODUCT)

PURPOSE:

The purpose of this procedure is to describe the process of quality control and inspection on the raw materials, in-process & final product

SCOPE:

This procedure applies to all products manufactured at SAMMAN plant.

DEFINITIONS:

PM: Production Manager.

QE: Quality Engineer.

RESPONSIBILITIES:

It is the responsibility of the QE to follow and implement the instructions described by this procedure covering the Quality Assurance activities for SAMMAN Raw Materials, in-process & final product.

PROCEDURE:

All Quality Assurance/ Control activities for Raw Materials, in-process & final product are mentioned in WI-82-02-1

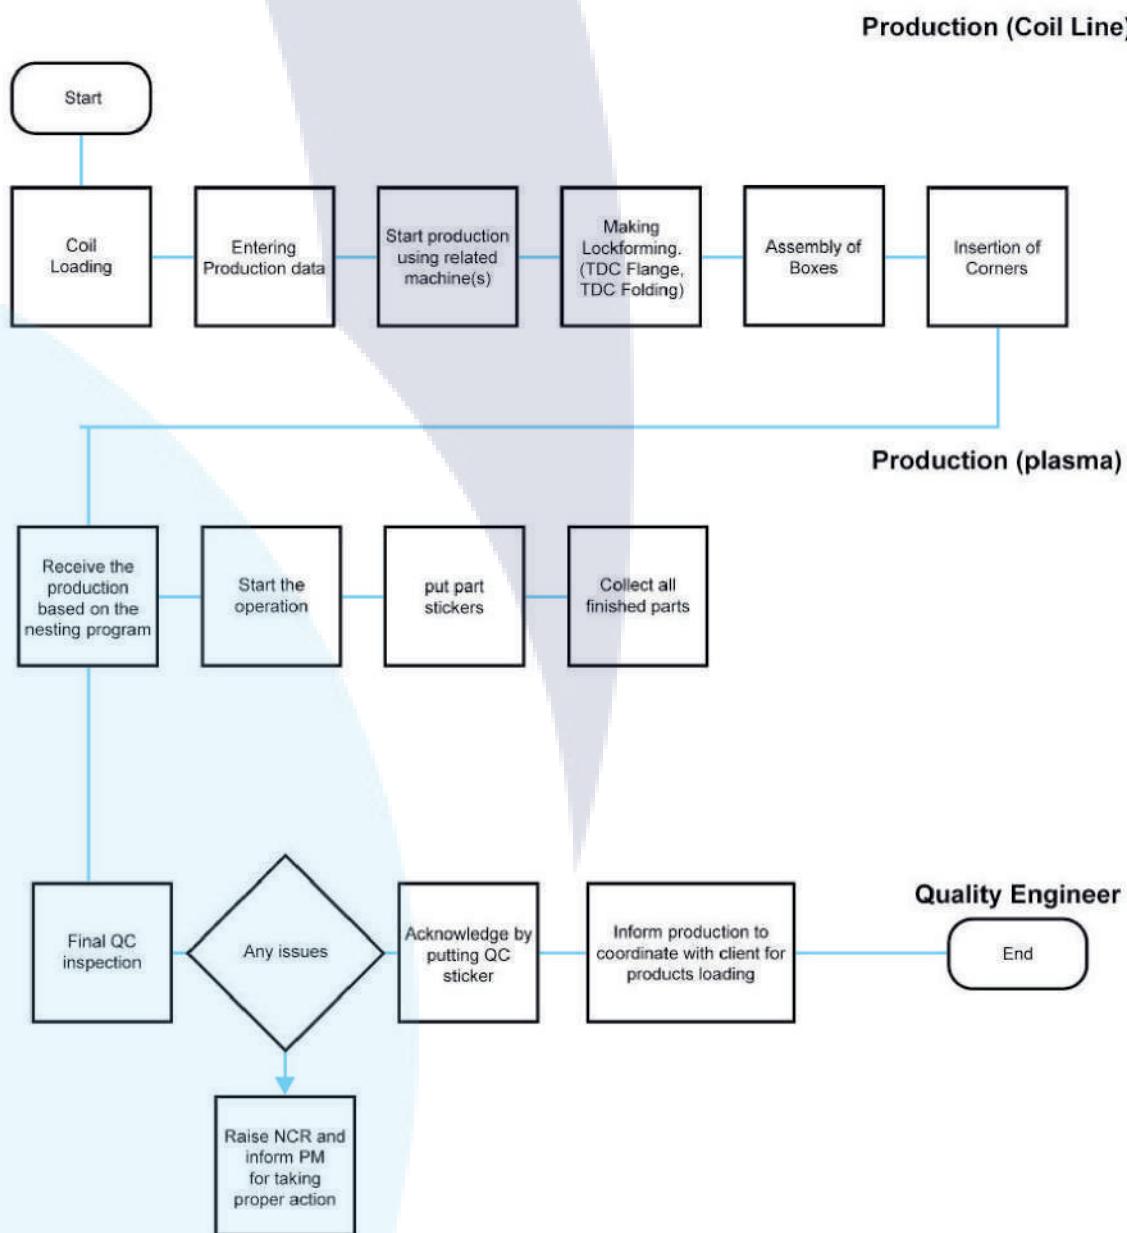

RELATED DOCUMENTS:

SOP-83-01 Procedure of Non-Conforming Product

DUCT PRODUCTS

RECTANGULAR DUCT

NOTES FOR TABLE 1-1:

1. "STD" denotes standard (nonvariable volume) air duct construction requirements (regardless of actual velocity level) for compliance with this document for all cases in which the designer does not designate the pressure classification for the duct system independent of fan static rating. "STV" denotes the standard construction classification for variable volume ducts for compliance with this document when the designer does not designate a class for this application See S1.4 on Page 1-8.
2. "A" denotes other pressure classes for which construction or installation details are give in this document and are AVAILABLE for designation in contract documents prepared by designers.
3. See Section S1.9 for sealing requirements related to duct pressure class.
4. The pressure class number in Tables 1-1 and 1-1S denotes construction suitable for a maximum level not less than the maximum operating pressure in the portion of the system receiving the classification from the designer.

Text references for ducts:

TABLE 1-1S STATIC PRESSURE		
Duct Pressure Class	Operating Pressure	
(in.)	(Pa)	
½" w.g.	125	Up to ½" w.g.
1" w.g.	250	Over ½" up to 1" w.g.
2" w.g.	500	Over 1" up to 2" w.g.
3" w.g.	750	Over 2" up to 3" w.g.
4" w.g.	1000	Over 3" up to 4" w.g.
6" w.g.	1500	Over 4" up to 5" w.g.
10" w.g.	2500	Over 6" up to 10" w.g.

DUCT PRODUCTS

RECTANGULAR DUCT

PRECAUTIONS FOR TABLE 1-1:

1. The construction is, as indicated elsewhere in this manual, qualified by freedom from structural failure; however, accidental overpressure that could occur must be provided for at the design stage by overpressure relief (such as fail-safe features, replaceable relief panels, controlled failure points, etc.)
2. Field tests (if ever used) to test structural adequacy should not exceed 125% of rated pressure. The assignment of a pressure class number less than the numerical value of the anticipated operating pressure involves risk.

3. Leakage test pressure should not exceed duct pressure class level.

4. Short-cycle pressure changes in duct systems can cause temporary noise. This is normally acceptable at system start-up and shutdown. To reduce or eliminate this noise, the designer must specify shorter-interval bracing, diagonal bracing, lagging, or other control means.

Duct Sealing Requirements Table 1-2

Seal Class	Sealing Required	Static Pressure Construction Class
A	All Transverse Joints Longitudinal Seams and Duct Wall Penetrations	4" W.G. AND UP
B	All Transverse Joint and Longitudinal Seams	3" W.G
C	Transverse Joints	2" W.G

IN ADDITION TO THE ABOVE, ANY VARIABLE AIR VOLUME SYSTEM DUCT OF 1½" W.G. CONSTRUCTION CLASS THAT IS UPSTREAM OF THE VAV BOXES SHALL ALSO MEET SEAL CLASS C.

DUCT PRODUCTS

RECTANGULAR DUCT

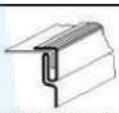

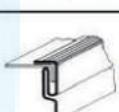

Standard Selection Table						
Derived from SMACNA Construction Standard, 3rd Revision-2005						
For Selection of Sheet Thickness Gauge / Transverse Connectors / Coil Width 1220mm

200 & Under	26	26	26	26	26	26
201-250	26	26	26	26	24	24
251-300	26	26	26	26	24	24
301-350	26	26	26	26	24	22
351-400	26	26	26	26	24	20
401-450	26	26	26	26	24	20
451-500	26	26	24	24	24	20
501-550	26	26	24	24	22	20
551-600	26	26	24	24	22	20
601-650	26	26	24	22	22	18
651-700	26	26	24	22	20	18
701-750	26	24	24	22	20	18
751-900	26	24	22	20	18	18-JTR
901-1000	24	22	20	20-JTR	18-JTR	18-JTR
1001-1200	24	20	20-JTR	18-JTR	18-JTR	18-JTR
1201-1300	22	20-JTR	18-JTR	18-JTR	16-JTR	16-JTR
1301-1500	22	20-JTR	18-JTR	18-JTR	16-JTR	16-JTR
1501-1800	22-JTR	20-JTR	18-JTR	16-JTR		
1801-2100	20-JTR	20-JTR	16-JTR			
2101-2400	18-JTR	18-JTR	16-JTR			
2401-2700	18-JTR	16-JTR				
2701-3000	16-JTR					

The End result of this manufacturing sophistication are, duct profiles and sections which have high strength, low leakages and low vibration characteristics. They require lighter gauge material than those produced by conventional means, coupled with the speed of manufacturing. This translates into unmatched economy and reliability.

Note

Duct sizes that are 19 " (483mm) and over and are 20G (1.00mm) or less, shall be beaded. Standard Construction shall be made of Galvanized Steel conforming to ASTM A653-G90, Sheets Thickness of the sheets will be as per the SMACNA Tolerance sheet.

Slip & Drive Cleat System

Slip and Drive cleat system is generally used for low end, less critical applications. Traditionally, only the drive cleats (C) which are positioning cleats were used for all four sides. To improve the strength, C & S Cleats are being used. C Cleats are normally used on the shortest side and S Cleats on the longest side.

1500			305 203	1.5 N.R.	305 203	1.5 N.R.	305 254	1.8 N.R.

Although the flat drive slip T-1 does not satisfy the EI calculation requirements for Class A or Class B reinforcement, tests predict its suitability for use as reinforcement within the limits of this table.

N.R. - No reinforcement is required; however the T - 1 Joint may be used.

DUCT PRODUCTS

RECTANGULAR DUCT

Straight Ducts: SD

Description:

SAMMAN ducts single wall duct & fittings are factory fabricated and supplied with factory applied sealant on all longitudinal joints for S & Drive slip ducts and additionally on transverse joints for all flanged end ducts & fittings.

SAMMAN ducts can be supplied either fully assembled form or knocked down form for straight ducts (minimum requirement for assemble of straight ducts on site) fittings will be delivered fully assembled with factory applied sealant.

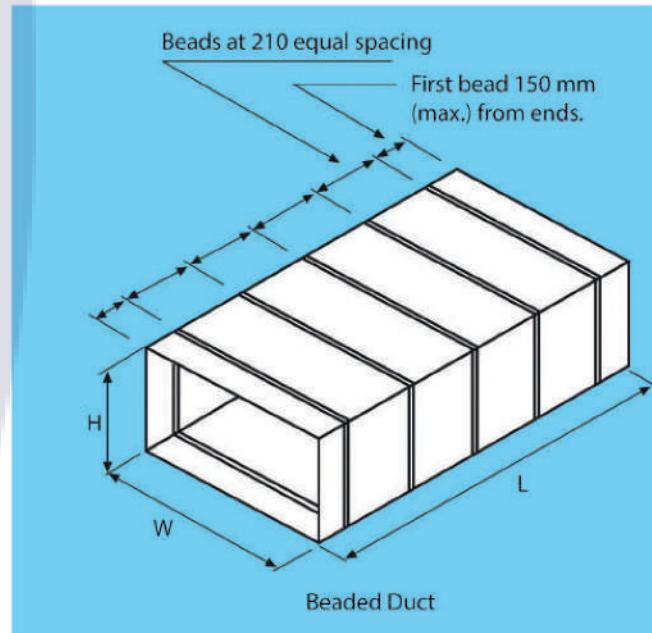

SAMMAN ducts can be supplied in various materials:

- G, galvanized steel (in accordance with ASTM 653, G90 coating)
- H, stainless steel (in accordance with ASTM A240/480 and various material grades)

Dimensions:

All straitght ducts are beaded or cross broken (except if duct is double wall, interanlly lined, negative pressure, Ga. 18 ducts, and 4 w.g. or above) and fittings are either cross broken or straight beaded, from size 483mm and above.

Standard duct lenght : 1200 mm (4 teet)

RECTANGULAR DUCT

Dobule Wall Ducts:

Description:

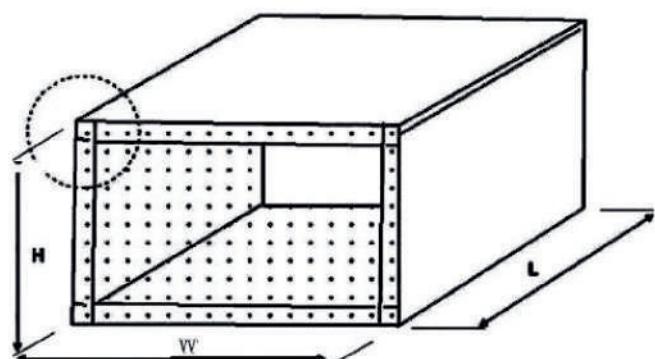

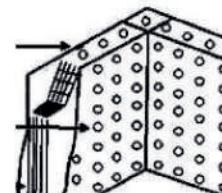

SAMMAN has a complete line of double wall insulated duct & fittings, each piece is constructed of solid metal outer shell and (either perforated or solid metal) inner shell surrounded by a layer of insulation.

The insulation serves both thermal & acoustical purposes. Our liner insulation is black woven fiber glass 1" thick, 48 Kg /m³ density. Several types of insulation material, densities, thicknesses are available.

Assembly Sequence

Maximum space between clips
 More than 3" W.G. 6"
 3" W.G. Or less 9"

The clamping TDC Clips are installed with 6 "wide full coverage TDC Clip tool as shown. For Clip Spacing, see (Recommended clip spacing)

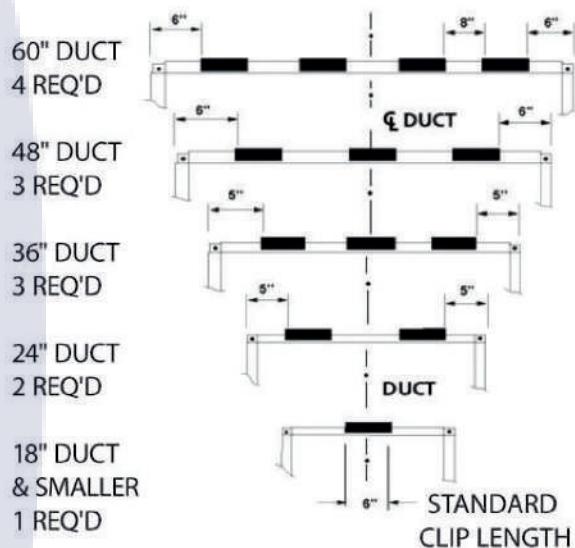

When using TDC in conjunction with slip-on four bolt Connec-tors, it may be desirable to increase tension on TDC Clip.

To tighten the grip of the TDC Clip to the flange by over bending the long leg of the Clip. Use the forming end of the tool as shown above

CAUTION: Use of a hammer for installation will damage Clip and may cause leakage.

Recommended Clip Spacing

Maximum space between clips
 More than 3" W.G. 6"
 3" W.G. Or less 9"

BLACK STEEL DUCT

Material of Construction

To supply Kitchen Exhaust Ducts from 1.2mm/ 3.0mm thick, black carbon-steel sheet for concealed ducts, ASTM A 366/A 366M,cold rolled sheets, commercial quality, with oiled, exposed matte finish,

Standard Length of the Ducts, maximum will be 1200mm.

Longitudinal Joints will be seam closed using Pittsburgh Seam / Welding

M S Iron Angles will be Stitch welded to the Black Steel ducts

Black Mild Steel RSA Connectors with holes for bolting:

40 x 40 x 3 RSA

40 x 40 x 4 RSA

40 x 40 x 5 RSA

50 x 50 x 4 RSA

Reinforcement Angles will be provided, based on the customer requirement.

Black Steel Ducts will be duly painted with Epoxy Primers.

FIREMAC FM60 / FIREMAC FM120 / FIREMAC FM240

DUCT PRODUCTS

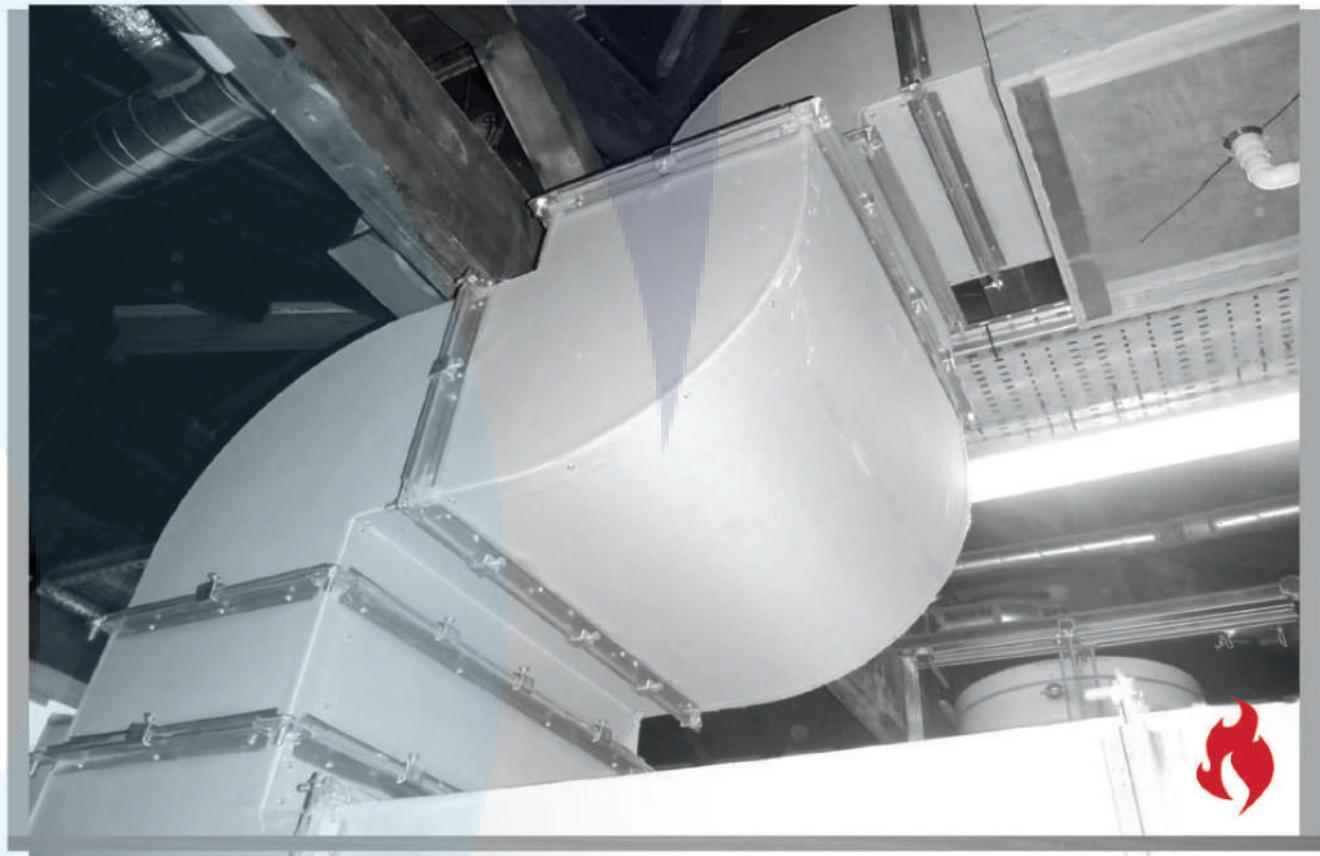

BLACK STEEL DUCT

PURPOSE OF FIRE RESISTANT DUCT WORK

New buildings must be divided into fire compartments in order that the spread of fire in the building is contained.

Weak points include ventilation ductwork passing from one compartment to another

Use of properly constructed fire resistant duct systems will prevent the fire from entering the ductwork, and prevent fire from using ductwork system to break out into other areas.

DUCT PRODUCTS

BLACK STEEL DUCT

FIREMAC FM60, FIREMAC FM120, FIREMAC FM240,

Firemac FM systems is a glass fibre cloth that is bonded to steel ductwork to give fire resistance for one — four hours

Fixed to ductwork at point of fabrication by ductworkers themselves

Physical fixing using adhesive

Mechanical fixing using rivets and / or speed screws

VOLUME CONTROL DAMPER

Rectangular Volume Control Dampers

Flange Type

MSC-RD-F / MSC-RD-S

Multi-Leaf volume control dampers have been specially designed to be used in Ventilation systems to control air flow and air pressure.

Volume control dampers are available for rectangular, Circular and Flat Oval Ducts.

The Frame is Rigid and Robust Assembly formed from Galvanized Steel Sheet, G90, 150mm X 35mm X 1.2mm.

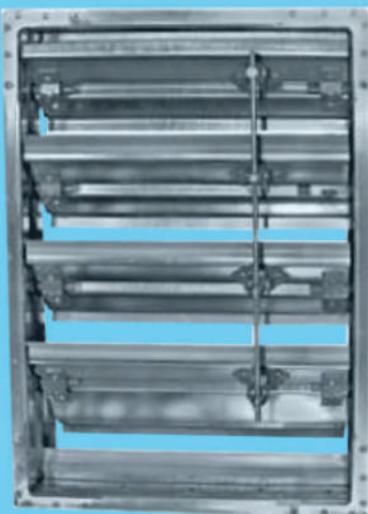

The **Blades** are formed from 20G (1.00mm)-18G (1.20MM), Galvanized Steel Sheet, G90, with Triple V profile for the good interlocking.

The **Bushings** are self-Oiling Bronze Bushings 12.7mmDiameter

The **Bearing** Pins are plated steel rod of 12.7mm Diameter

The **Blade Brackets** and Set Scraps are from Zinc Plated

Side seals are provided to have a minimum clearance and for smooth operation of dampers

**MS4104, MS4109, MS4604,
MS4609, MS8104, MS8109**

**Fast-Acting, Two-Position Actuators
FOR FIRE/SMOKE CONTROL APPLICATIONS**

Honeywell

SPECIFICATION DATA

Description

The MS4104, MS4109, MS4604, MS8104, MS8109 Fast-Acting, Two-Position Actuators are spring return direct coupled actuators (DCA) with an integral junction box for on/ off damper control. The actuator accepts an on/off signal from a single-pole, single-throw (spst) controller. Reversible mounting allows actuator to be used for either clockwise (cw) or counterclockwise (ccw) spring return and are designed to operate reliably in smoke control requiring Underwriter's Laboratories Inc. UL555S ratings up to 350 °F.

FEATURES

- 30 lb-in. (3.4 N·m) or 80 lb-in. (9 N·m) minimum driving torque at 350 °F (176 °C).
- Reversible mounting facilitates use in either clockwise (cw) or counterclockwise (ccw) spring rotation.
- Integral spring return ensures level of return torque.
- Stainless steel internal spring.
- Fifteen-second spring return timing.
- No special cycling required during long-term holding.
- No audible noise during holding.
- Patent pending design eliminates need for limit switches to reduce power consumption.
- Models available for 24, 120 and 230 Vac.
- Ninety-five degree angle of rotation.
- Actuator holds rated torque at reduced power level.
- Die-cast aluminum housing.
- Housing design allows flush mounting to damper.
- Designed to operate reliably in smoke control systems requiring Underwriter's Laboratories Inc. UL555S rating up to 350F.
- Models available with SPST position-indicating switches (7°, 85° stroke).

MS8109F1210	24	2 SPST ^a	80 (9)

^a Internal switches are designed to pass UL555S requirements (at 350°F for 30 minutes) and are intended for use as position indication.

Electrical Ratings:

Power Input:

MS4104F, MS4109F: 120 Vac ± 10%, 60 Hz.
MS4604F, MS4609F: 230 Vac ± 10%, 50/60 Hz.
MS8104F, MS8109F: 24 Vac + 20%, 10%, 50/60 Hz.

Power Consumption:

MS4104F: Running: 0.18A, 18W. Holding: 0.11A, 9W
MS4109F: Running: 0.25A, 23W. Holding: 0.13A, 7W
MS4604F: Running: 0.13A, 18W. Holding: 0.10A, 11W
MS4609F: Running: 0.13A, 23W. Holding: 0.09A, 7W
MS8104F: Running: 16VA. Holding: 8VA
MS8109F: Running: 23VA. Holding: 7 VA

Electrical Connections:

Power Lead Wires:

MS410xF and MS460xF: 32 inches (0.8m), 18 AWG
MS810xF: 39 inches (1m), 18 AWS
Switch Lead Wires: 18 AWG, 2 color coded leads.

Controller Type:

MS4104, MS4109: Line voltage (120 Vac), two-position, spst (Series 40).
MS4604, MS4609: Line voltage (230 Vac), two-position, spst (Series 40).
MS8104, MS8109: Low voltage (24 Vac), two position, spst (Series 80).

Device Weight:

5 lb (2.3 kg).

Noise Rating (Maximum):

Holding: 20 DBA at 1m (no audible noise).

Temperature Ratings:

Ambient: 0°F to 130°F (-18°C to 55°C),
Shipping and Storage: -40°F to 140°F (-40°C to 60°C).

IMPORTANT

The actuator is designed to meet UL555S standards at 350°F (176°C).
The actuator must be tested with the damper to achieve this rating.

Humidity Ratings:

5% to 95% RH noncondensing.

Stroke:

95° ± 3°, mechanically limited.

Torque Rating (at rated voltage):

Spring Return:

MS4104F, MS4604F, MS8104F: 30 lb-in. (3.4 N·m).
MS4109F, MS4609F, MS8109: 80 lb-in. (9 N·m).

Stall Maximum:

MS4104F, MS4604F, MS8104F: 150 lb-in. (17 N·m).
MS4109F, MS4609F, MS8109: 240 lb-in. (27 N·m).

350oF Driving:

MS4104F, MS4604F, MS8104F: 30 lb-in. (3.4 N·m).
MS4109F, MS4609F, MS8109: 80 lb-in. (9 N·m).

Timing (At Rated Torque and Voltage):

Drive Open: 15 seconds typical.

Spring Close: 15 seconds typical.

Design Life (at Rated Voltage):

30,000 full stroke cycles.

Cycling Requirements:

The actuator and the internal spring are designed to require
No special cycling during long-term holding.

Honeywell recommends following all local, state and National
Codes for periodic testing of the entire smoke control system. Refer to
National Fire Protection Association (NFPA) National Fire Codes[®]:
NFPA90A, NFPA90A, NFPA2A and NFPA 92B for your application.
NFPA recommends periodic examination of each fire/smoke damper
(semi-annually or annually) to ensure proper performance.

Minimum Damper Shaft Length:

2 in. (51 mm).

Mounting:

Round 1/2 inch shaft adapter with 1/4 inch set screws.

Threads: 1/4-20 UNC-2A

Material: Alloy Steel hardened to HRC 45-53

Thread Lock: Nylon Patch

IMPORTANT

Honeywell does not recommend using linkages with these actuators
because side-loading of the output Hub reduces actuator life.

Environmental Protection Ratings:

NEMA, IP40.

Accessories:

205649 Mounting Bracket (not supplied with actuator).

PLENUM BOX

SAMMAN PLENUM BOX:

Construction:

Frame: 24, 22 or 20 Gauge Galvanized steel Sheet

Spigots: Circular Spigots of 75mm Length As standard. Square, Rectangular Shaped Spigots are Available as Options

Optional Accessories: Volume Control Damper

Description:

Fabricated from 24, 22, or 20 Gauge Galvanized Steel Sheet.

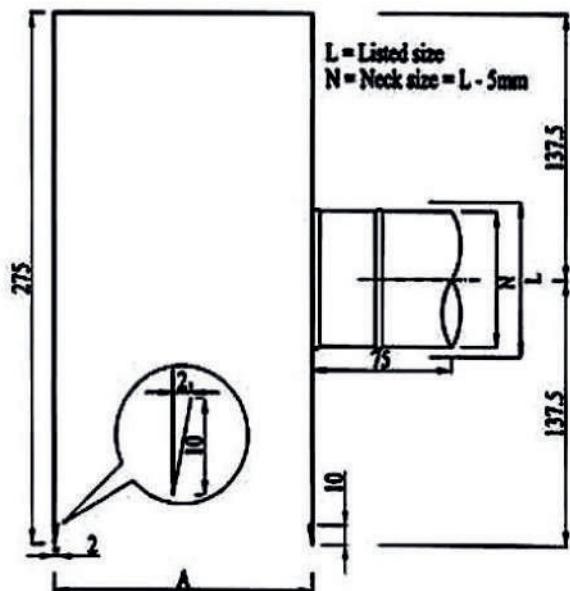

Circular Spigots of Required Diameter and Standard Length of 75mm would be fixed to The Plenum Box. Square, Rectangular Shapes Spigots are Available.

Plenum Boxes with side inlet are standard. Other Positions are Available as per The Site to Suit Clients' Specifications.

Plenum Boxes Have Hemmed Edge at the Opening For Fixing Universal Mounting Brackets.

Plenum Boxes of Length of Up to Two Meters Can Be Manufactured with single Spigot. For More Than 2 Meters Plenum Boxes will be arranged with Multiple Spigots.

Volume Control Dampers Can be Fitter to the Spigots On Request.

ACCESS DOOR

Access Door with Piano Hinges

Construction:

Frame and door panels: Made of 22 gauge galvanized steel sheet.

Insulation of door panel: 25 mm thick, 24 or 48 kg/m³ density fiber glass as standard. Other insulation specifications are optional.

Description:

Frame and door panels are fabricated from 22 gauge galvanized steel sheet.

Frame is provided with 3 mm thick neoprene gasket all around to avoid air leakage.

Door panel is internally insulated with 25 mm thick, 24 or 48 kg/m³ density fiber glass for thermal and acoustic insulation.

Door frame is provided with single cam lock for air tight door closure.

Structure is designed to withstand high pressure differences.

Sizes are available from 150 x 150 mm to 600 x 600 mm with an increment of 50 mm.

Access doors offer quick easy installation where duct access required.

Applicable in air conditioning plant rooms, plenums, air handling units and near fire dampers.

DUCT PRODUCTS

ACCESS DOOR

Access Doors for Grease Hood / Kitchen Exhaust Ducts Construction Features:

Same thickness as the duct (16G Carbon Steel or 18G Stainless Steel)

Neoprene Gaskets all around Mounted to Door

Carbon Steel Fasteners or Stainless Steel Fasteners

Doors mountings shall ensure a proper, secure fitting over openings

Access Doors shall be Field Welded all around with the ducts

Fixed with Removable Handle

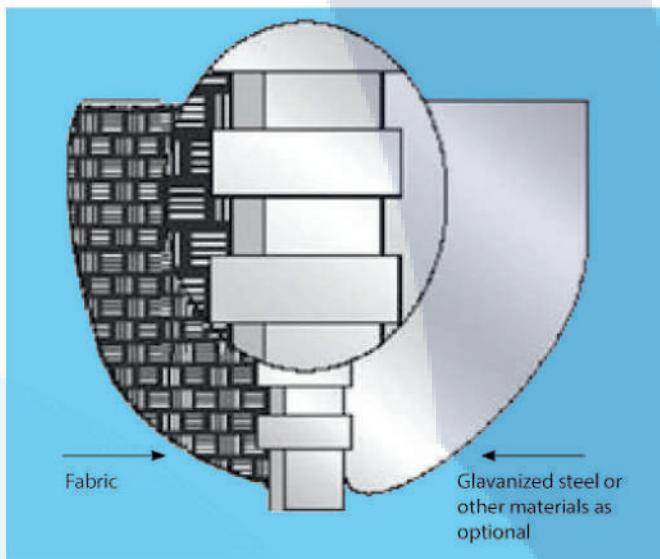

Access Doors for Rectangular Ducts

Access Doors for Round Ducts

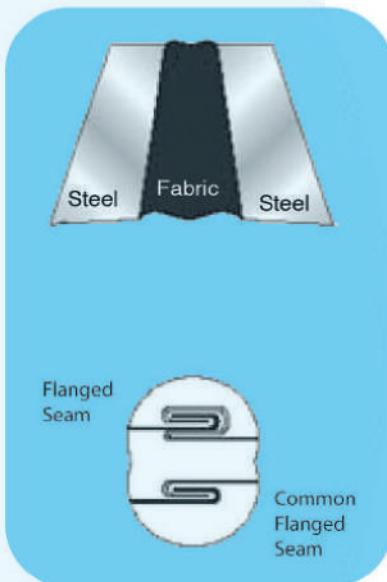

DUCT PRODUCTS

FELEXIBLE CONNECTORS

Flanged Seam

The double flanged seam gives an exceptional strength to the connection between steel and fabric. The above seam is used in all our duct connectors.

Description

Flexible Duct Connectors are Used to eliminate duct system noises and vibrations for industrial and commercial applications.

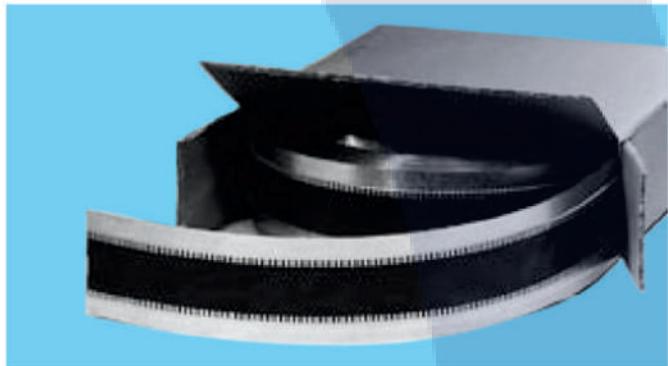

The Basic use is to isolate the vibration and noises to the source with an air tight flexible joint consisting of a fabric fastened to steel metal on both sides. The flexible connector is fixed between the A/C equipment or fan and the ductwork

Various cloth types, cloth widths and steel widths are available in order to meet of the installation requirements at job sites.

DUCT PRODUCTS

FELEXIBLE CONNECTORS

Type Vinyl - DCV

Description & Application

Flexible Duct Connector with a PVC Polyester coating is suitable for applications with high requirements to the moisture resistance and good mechanical and chemical resistance. the connector is appropriate for Round, Oval and Rechangular air ducts. It can be shaped easily with a minimal percentage of waste.

FELEXIBLE CONNECTORS

Mounting Instructions

Mounting Instructions for Flexible Connectors

At a noch, cut a length equivalent to the perimeter plus 5 to 6 cm.

Make a cut at the edge of the lifted seam section

Coat the cloth with its appropriate adhesive

Press together firmly

Lift the seam outward to a right angle.

Bend down the seam whilst ensuring that the cloth remains fastened

Join both sides by adhesive and or stitching

Spotweld the steel.

General Notes:

Make sure that the notched side faces outward and that the position of the joint is not at the corner.

GT - Tape

ET

Bolts & Nuts

Description:

The Gasket Tape (GT) is manufactured out of polyethylene form with one side self adhesive and is appropriate for longlife in combination with a high air humidity and chemical inertness.

Standard Length: 10 meter per roll.

Type & Size:

GT 6/19mm 6mm thick, 19mm wide, 10 roll per bag.

Description:

ET is an EPDM/Neoprene modified elastomeric closed cell self -adhesive form gasket tape for cooling and heating air duct connections to prevent air leakage, reduce vibration/noise and also serves as thermal insulation to prevent condensation and heat transfer. With acrylic pressure sensitive adhesive. ET is easily installed on the surface of the connection joint.

Standard Length: 10 meter per roll.

Type & Size:

ET052010 6mm thick, 19mm wide.

Description:

Bolts & Nuts are built of galvanized steel hexagonal cap screw full thread with galvanized hexagonal nut.

Bolts = M10 x 30MM

Nuts = M10

DUCT SEALANT

Duct Sealant

Description:

STAR ACRYSEAL is fire retardant, aqua based, vapor barrier sealant for low, medium, and hight pressure or high velocity-metal, fiberglass and flexible heating and air conditioning air duct. It is specially formulated to meet Middle East weather condition. It is highly elastic in nature. It has excellent adhesion to metal, aluminum, etc. This exhibits excellent strength, flexibility and resistance to heat and cold. It performs as tough and flexible adhesive and sealant, forming a durable seal against air leakage.

STAR ACRYSEAL does not contain Asbestos, Lead, Mercury or Mercury Copounds.

PHYSICAL & CHEMICAL RESISTANCE

Highly resistant to mold, mildew, water, extreme temperature changes and aging. Resistant to oil or grease and midly resistant to diluted alkalis and acids.

CONFORMS TO

- ASTM C-411 (Hot Surface Performance of High Temperature Thermal Insulation)
- ASTM C-732 (Agine Effects of Artificial Weathering on Latex Sealants)
- ASTM D-2202 (Slump Test)

CAUTION

Crystalline Silica. Eye contact may cause irritation. Prolonged skin contact may cause irritation. No expected harmful effects from inhalation of vapors.

STORAGE & SHELF LIFE

Store under cover, protect form direct sunlight and high temperature (>30°C). Shelf life is up to 12

Base	Synthetic resin
Color	White/Grey
Appearence	Smooth paste, free of particles
Density	1.6 ± 0.5
Tack free time, minutes	4-8
Viscosity Flow ASTM C 639	Non-Sag
Application temp.	Min 5°C
Flash Point	Non flammable
Bead Consistency	Non-Sag bead free of air bubbles
Adhesion on Ceramic, Concrete, Mild steel	Good

Packing

When caulking gun is used it is recommendable to stroke the duct sealant to be sure to get a good contact for the best results; WDS - 606 is a water-based duct sealant without any solvnts, hands & tools can be cleaned with water. WDS - 606 has been proven against wet & somewhat dirty materials, however, we advise a clean suface for the best

Packing

1 Box of WDS - 606 = 25 cartridges each 400 grams.

DUCT SEALANT

FOIL/SKRIM/KRAFT (FSK) SEALING TAPE

DESCRIPTION:

Foil, Skrim and kraft combined with a pressure sensitive adhesive and release liner.

USES:

ABRO 3450 is used for sealing cold and temperature duct seams and joints where FSK is the basic insulation facing. The skrim blends with the primary facing and give a strong, finished look. At the same time the tape assures the integrity of the insulation. it provides an excellent vapor seal when applied at temperatures above 40°F to clean, dry surfaces. Use of applicator, provide, wil give best results.
Store in a cool, dry place (60°F-80°F).

FEATURES/BENEFITS:

Aggressive Adhesive

Assures positive seal to maximize insulation integrity

Easy Liner Removal

Makes application simple and saves labor time

Foil

A vapor barrier essential to the insulation performance.

DUCT PRODUCTS

DUCT SEALANT

Gasket Tape - GT Tape

Description

Gasket Tape (GT) is particularly appropriate to circumstances where a longlife in combination with a high air humidity resistance and chemica inertness is requires. The tape is hardly subject to decay. The tape has also a thermic insulating character. it is often used as aceiling material in ventilation systes and machine building.

Construction:

The tape has been manufactured out of polyethylene foam with one side self adhesive. The elongation is about 40% (DIN 53577)

The tape has not been provide with a protection layer.

Specifications

Temperature range:
-30 °C up to 80 °C

Color:
Black

Adhesion
The adhesion is 1, 0kg/2.5 cm if the surface is fat free and dust free

Storage:
GT Tape has a lifespan of one year at room thmperature if the packaging is sealed.

Packing

Standard Length: 10 meter per roll.

GT 6/19 6mm thick, 19mm wide, 10 rolls per bag.

Other thicknesses & widths are available on request.

SPIRAL DUCT

Available in Numerous Materials

Round duct fittings are available in an array of different material options:

- Paint Grip A-60¹
- Poly-vinyl coated¹
- Galvanized 
- Aluminum 3003
- Stainless 304 or
- Copper
- Aluminized Steel

Used in Wide Range of Applications

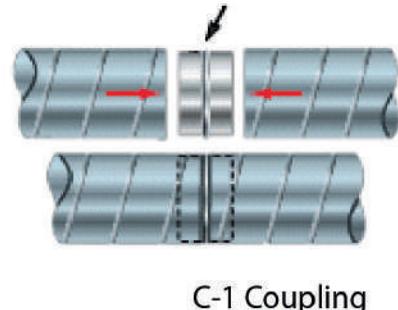

The versatility of spiral pipe makes it ideal for an array of applications, including:

- Industrial
- Commercial
- Bulk Materials
- Underground
- Chemical

Pipe-to-Pipe Slip Joint (Our Standard)

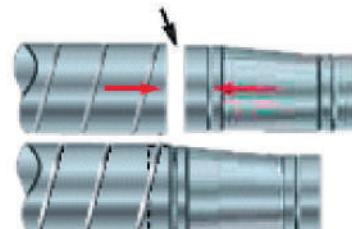

Coupling: Pipe-To-Pipe (female-to-female) slip joints require a standard C-1 coupling, which is male. C-1 couplings are also used with flexhose.

C-1 Coupling

Pipe-To-Fitting Slip Joint (Our Standard)

No coupling required: Since pipe sections are female and fittings male, they just slip together.

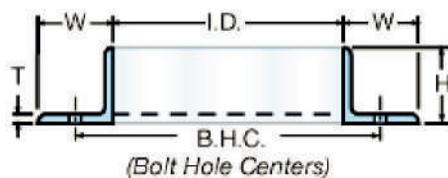

Flange-to-Flange Joints (Optional)

- Flange-to-flange joints are widely used to connect pipes in dust and fume control applications, in outdoor applications, and for additional strength in high positive or high negative pressure applications.
- The basic flange-to-flange joints consist of two facing flanges which are fastened to the ends of the spiral pipe with screws, pop-rivets, or sometimes by tack welding-except in the case of Vanstone flanges, which do not require fastening to the duct under standard loading conditions. The two flanged ends are then fastened together with bolts, screws, or flange clamps.
- Bolts are used for permanent installations and when the pipe must mate with fans or other air moving equipment. In installations where there is a need for frequent maintenance or cleaning, flange clamps are used
- Spiral Manufacturing offers three configurations of flange-to-flange joints: (1) Angle Ring flanges, (2) the most-widely-used Vanstone flanges, and (3) Engineered flange systems, such as Accuflange, Spiralmate, and Wonderflange.

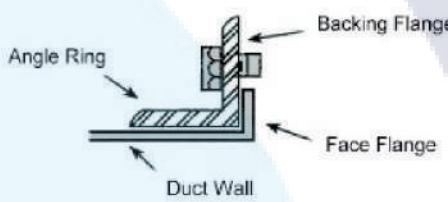

Basic Angle Ring Flanges *(Optional)*

Pressed and rolled steel angle rings are used widely in joining ductwork in dust and fume control work. Available in 3" to 96" diameters, standard rings are unpainted, mild steel. (Galvanized and Stainless Steel available). They are available with or without holes. Nearly any bolt circle spacing or hole size is available.

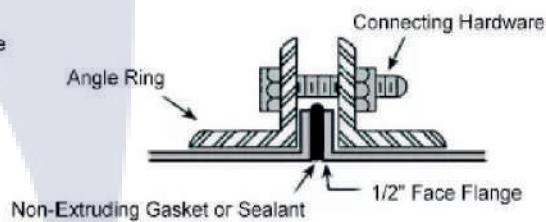

Vanstone Flanges *(Optional)*

Vanstone Flanges are a very practical and labor saving method for connecting Spiral duct and fittings. Vanstone connections consist of a "face flange" and a separate "backing flange" or angle ring" that is slip fit over the Spiral duct.

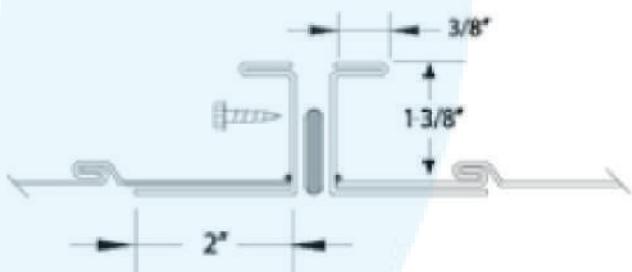

Van Stone Flange Connection

Complete Van Stone Joint

Sheet Metal Accuflange Joint *(Optional)*

AccuFlange is a patented connecting system, which, when installed and sealed per recommendations, is suitable for use on all systems across a range of internal duct pressures from -10" W.G. to +10" W.G. It is available for both single and double wall pipe, and in a variety of materials.

SPIRAL DUCT

COMPARISON BETWEEN SPIRAL DUCT AND RECTANGULAR DUCT

Aspect	Spiral Duct	Rectangular Duct
Shape	Cylindrical	Rectangular
Airflow Efficiency	High	Moderate
Installation	Easy	Time-consuming
Space Utilization	Requires more space	Suited for tight spaces
Cost	Expensive	Less expensive
Aesthetics	Industrial look	Concealable, visually appealing

specific factors may vary depending on the HVAC system, installation requirements, and other considerations. It's always recommended to consult with a professional HVAC contractor for a more accurate assessment based on your specific needs.

SPIRAL DUCT

SAMMAN SPIRAL DUCT SYSTEM

SAMMAN Spiral Duct System:

A complete spiral duct and circular fittings program with a product range from 63mm up to 1500mm to cover all the pressure applications from low/medium to high pressure systems with clear advantages in lower installation and operational cost and superior strength, making the SAMMAN Round Duct System a more economical alternative to traditional rectangular duct systems.

SPIRAL DUCT

ASSEMBLY INSTRUCTIONS

Description

SAMMAN Round Duct must be assembled according to these instructions:

Before Assembly:

The duct must be free from dirt.

Shortening Ducts:

Ducts must be cut at right angles and carefully deburred.

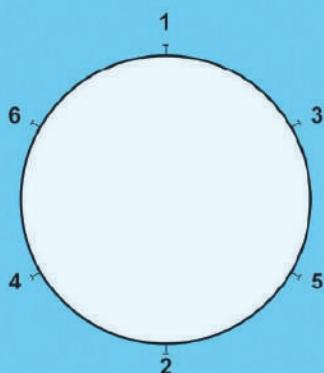

Assembly of Fittings:

- Check that ducts and fittings are undamaged.
- Push the fittings into the duct right to the stop. Turning the fitting a little makes insertion easier.
- Fasten the fittings to the duct with self-tapping screws or pop rivets.

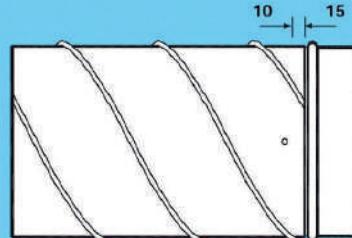

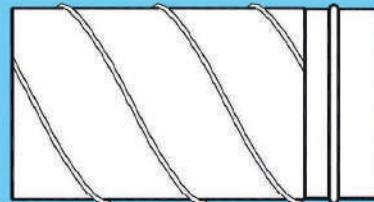

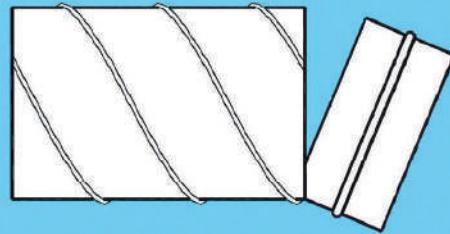

The following numbers and dimensions of steel screws and pop rivets are recommended:

$\varnothing d$ mm	Min. diameter mm	Number
63-125	3.2	2
140-250	3.2	3
280-630	3.2	4
710-1250	4.0	6
1400-1600	4.8	12

Distribute the screws or pop rivets evenly around the circumference. In the event of incorrect assembly, holes caused by screws or pop rivets must be sealed.

SAMMAN SPIRAL DUCT

2131	(85)	thru	(98)	2500	18	16	16	16	14

- Circular duct fittings shall have a wall thickness not less than that specified for longitudinal seam straight duct in above table 2-1.
- Corrugated ducts are not reflected in above table.
- Longitudinal seam duct are continuously welded and supplied in 1 meter long.
- Above schedule meet the requirements of SMACNA HVAC Duct Construction Stds. Metal and Flexible, Second Edition 1995.

Table 2-2 Spiral Duct Wall Thickness Schedule (Negative Pressure)

Duct Diameter in mm (inches)				-500 Pa, (2" W.G.) Negative Pressure		-1000 Pa, (4" W.G.) Negative Pressure		-2500 Pa, (10" W.G.) Negative Pressure

$D_e = 1.30 [(ab)^{0.625} / (a+b)^{0.250}]$ where,
 a = length of one side of rectangular duct (mm).
 b = length of adjacent side of rectangular duct (mm).
 D_e = circular equivalent of rectangular duct for equal friction and capacity (mm).

Example: convert rectangular duct 500x500 to equivalent round.
 a = 500, b = 500; from above table $D_e = 547$

RANGE & LIMITATION

Air duct system is recommended to be used in the system of supply, return, fresh air and exhaust for air conditioning, heating and ventilation within the below limits

PRE INSULARED DUCT

PHENOLIC SYSTEM

Introduction

Overview

The heating, ventilation and air-conditioning (HVAC) industry is in the midst of a dynamic era. However, air-distribution ductwork, a critical component of HVAC systems, has remained virtually unchanged since the early 1900s.

Several factors have introduced the need to revolutionise HVAC ductwork. Energy use has continued to escalate, and thus the demand for energy reducing solutions has intensified. Requirements for clean air are becoming increasingly prevalent. Speed of construction has become a valuable asset. Floor space and headroom are under constant pressure.

Kingspan Insulation has proven the value of its products and Kingspan PalDuct has been used in some of the most prestigious projects around the world, due to its known advantages over the traditional galvanised sheet metal ductwork.

Kingspan Insulation has commissioned state of the art manufacturing plants, established workshops in different regions worldwide and also provided specialised and comprehensive training courses conducted by service oriented and experienced trainers well-equipped with the latest technologies, all to ensure quality HVAC ductwork fabrications and installations. This is closely supervised by the representatives from subsidiary companies and sales offices worldwide.

In 2014 Kingspan Group acquired Pal International and assimilated it into its Insulation Division, which subsequently became responsible for the sales and marketing of Kingspan PalDuct products across the globe.

PRE INSULARED DUCT

PHENOLIC SYSTEM

What is Kingspan PalDuct Phenolic System?

Kingspan PalDuct Phenolic Panels comprise a fibre-free high performance rigid thermoset phenolic insulation core faced on both sides with a composite foil facing.

Kingspan PalDuct Phenolic Panels are available in a standard thickness of 20mm and 30mm.

Kingspan Insulation offers a complete product line, providing all materials, tools and accessories necessary for the effective fabrication of ductwork from the Kingspan PalDuct Phenolic System.

The ductwork from Kingspan PalDuct Phenolic System is only fabricated by specially trained fabricators who have completed the Kingspan PalDuct Phenolic System training course and who are registered with Kingspan Insulation.

Advantages of Kingspan PalDuct Technology

- Easy to clean and hygienic.
- Environmentally friendly: CFCs and HCFCs -free (zero ODP and GWP ≤ 5).
- Clean air: fibre-free insulation core.
- Resistant to fungus growth.
- Space saving: flush-fitting installation possible.
- Low ' λ ' value.
- Fast-track installation: rapid erection combined with single-fix installation.
- On-site fabrication capability.
- No limits to duct sizes.
- High-compressive strength.
- High rigidity/integrity.
- Base material is impermeable to moisture.
- UL Listed as a Class 1 Air Duct to Standard for Safety UL 181 (Factory Made Air Ducts & Air Connectors).

Certifications

Kingspan PalDuct Phenolic System is manufactured to the highest standards under a management system certified to ISO 9001: 2015 (Quality Management System), ISO 14001: 2015 (Environmental Management System), ISO 45001: 2018 (Occupational Health and Safety Management System) and ISO 37301:2021 (Compliance Management System).

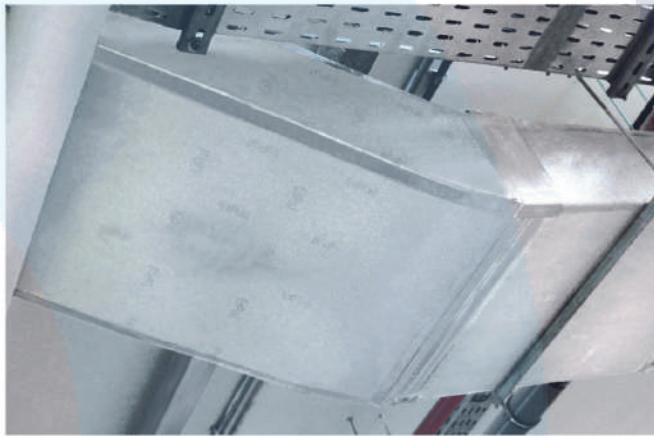

PRE INSULARED DUCT PIR SYSTEM

Introduction

Overview

The heating, ventilation and air-conditioning (HVAC) industry is in the midst of a dynamic era. However, air-distribution ductwork, a critical component of HVAC systems, has remained virtually unchanged since the early 1900s.

Several factors have introduced the need to revolutionise HVAC ductwork. Energy use has continued to escalate, and thus the demand for energy reducing solutions has intensified. Requirements for clean air are becoming increasingly prevalent. Speed of construction has become a valuable asset. Floor space and headroom are under constant pressure.

Kingspan PalDuct systems have been the pioneer in pre-insulated ducting. Pal was the first company in the world to introduce the innovative and revolutionary rigid pre-insulated ductwork as an alternative to sheet metal ductwork. It was invented by Claudio Ferraro of Bologna, Italy in 1965.

Kingspan Insulation has proven the value of its products and Kingspan PalDuct has been used in some of the most prestigious projects around the world, due to its known advantages over the traditional galvanised sheet metal ductwork.

Kingspan Insulation has commissioned state of the art manufacturing plants, established workshops in different regions worldwide and also provided specialised and comprehensive training courses conducted by service oriented and experienced trainers well-equipped with the latest technologies, all to ensure quality HVAC ductwork fabrications and installations. This is closely supervised by the representatives from subsidiary companies and sales offices worldwide.

In 2014 Kingspan Group acquired Pal International and assimilated it into its Insulation Division, which subsequently became responsible for the sales and marketing of Kingspan PalDuct products across the globe.

PRE INSULARED DUCT PIR SYSTEM

What is Kingspan PalDuct Technology?

- Complete line of components and accessories.
- Professional hand tools and automated machinery.
- Specialised training courses for ductwork fabricators.
- "Duct Design Software" to size the ductwork and estimate the material needed.
- Technical Support.

Advantages of Kingspan PalDuct Technology

- Easy to clean and hygienic.
- CFC/HCFC-free: helping to minimise the effects of Ozone Depletion and Global Warming
- Clean air: fibre-free insulation core.
- Resistance to fungus growth.
- Space saving: flush-fitting installation possible.
- Low λ value.
- Fast-track installation: rapid erection combined with single-x installation.
- On-site fabrication capability.
- No limits to duct sizes.
- High-compressive strength.
- High rigidity/integrity.
- Base material is impermeable to moisture.

Fibre-free Core

Kingspan Insulation also provides technical support to appointed distributors and clients in order to ensure the consistent quality of HVAC ductwork fabrication and installations.

Certifications

Kingspan PalDuct PIR System is manufactured to the highest standards under a management system certified to ISO 9001: 2015 (Quality Management System), ISO 14001: 2015 (Environmental Management System), ISO 45001: 2018 (Occupational Health and Safety Management System) and ISO 37301:2021 (Compliance Management System).

CFC/HCFC-free Insulation Panel

People, nowadays, are becoming even more conscious of their impact on the environment. Kingspan PalDuct PIR Panel complies to the concern for the increasing Ozone Depletion and Global Warming.

The system uses panels which comprise a polyisocyanurate (PIR) insulation core, that is manufactured with a CFC/HCFC-free blowing agent. The blowing agent used has zero Ozone Depletion Potential (ODP) and low Global Warming Potential (GWP).

Specialised Training & Technical Support

Kingspan Insulation provides specialised and comprehensive training courses to appointed distributors and clients in order to ensure that fabricators carry out the fabrication of Kingspan PalDuct Systems for any project directly on-site, assuring fast and more accurate execution of duct installation requirements.

PRE INSULARED DUCT

PHENOLIC VCD

PalDuct™ Phenolic VCD

Fibre-free
Core

The Kingspan logo, which includes a golden lion rampant holding a shield in its front paws. To the right of the lion is the word 'Kingspan' in a large, bold, blue serif font.

PRE INSULARED DUCT PHENOLIC VCD

Product Information

Product Description

Kingspan PalDuct Phenolic VCD is made from a high performance rigid thermoset phenolic insulation core, faced on both sides with an aluminium foil reinforced with a glass scrim (outerface embossed / non embossed). The insulation panels are fixed together with a polymer / aluminium profile to form ductwork sections.

The blades are made of aluminium aerofoil, which provides air flow.

The channel frame has a standard width of 125 mm. However, the channel width varies from 100 mm to 150 mm, dependent on the height of the damper and the width of the blade.

For a Kingspan PalDuct Phenolic VCD with a height of less than 200 mm, it must only include a single blade. However, those with a height of more than 200 mm may include multiple blades. In addition, those with a height of more than 200 mm can have either opposite or parallel blades.

AC GRILLS CEILING DIFFUSERS

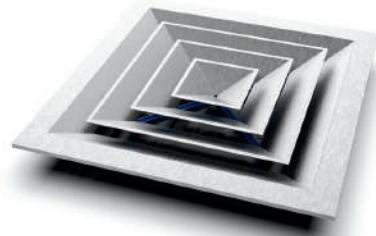

Louvered face , multi directional with removable co

multi direction diffusers represent an optimum solution for the diffusion of air from

ceiling in modern concept areas with a high use of extrude aluminum with which thanks for their precise line they harmonize perfectly . the different shape of the cone (core) in respect of the number of the air flows (1,2,3 & 4 ways) can itself create an aesthetic element to be utilized.

Features & characteristics :

- Material : Frame & inner cones (core) are made of
- Extruded Aluminium Profiles of 6063 Alloy by which
- allow the diffusers to be suitably used for both internal & external applications.
- Both frame & inner cones (core) have a general wall thickness of 1.5 mm (+ 0.2 mm tolerance).
- Available in both square & rectangular shapes.
- Units are flush mounted & available with different pattern arrangements 1,2,3& 4 ways (i.e.different ways of air discharge directions).
- Available in wide variety of standard neck sizes ranging from 150 x 150 up to 600 x 600 mm in 75 mm increments.
- The inner cones (core) is fully removable to provide

Easy :Installation, Adjustment of key operated OBD & Maintenance.

- Core exchange by different pattern in future.
- The core is held in place & fixed to the frame by two loaded spiral galvanized steel springs.
- The ceiling diffuser projects from the mounting surface by 5 mm.
- Recommended for use in rooms with ceiling heights ranging from 2.5 m to 4.0 m.
- Accessories

AC GRILLS CEILING DIFFUSERS

Louvered face , multi directional with removable core

Pattern Selection :

The pattern selection is determined by the shape of the space to be conditioned, the number of diffusers in it, and the type and the location of lighting fixtures or other devices mounted on the same ceiling.

For Example : a two way square diffuser, opposed blades Model 2WS-O might be used in a corridor areas. On the other hand a larger area can often be divided into squares or rectangles of nearly equal areas, if a diffuser can be located in the center of each of these areas, a pattern of Model 4WS (for square areas) or 4WR (for rectangular areas) could be used for four way discharge.

Selection Procedure :

Having established the position where terminals can be sited, refer to data showing core pattern details and select the suitable core pattern required.

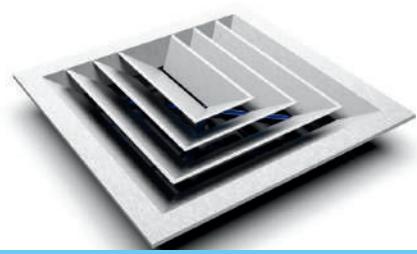

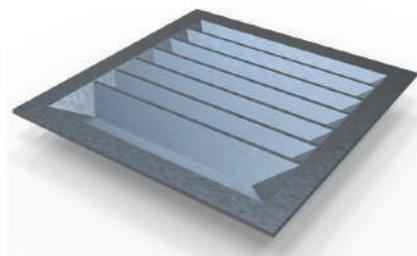

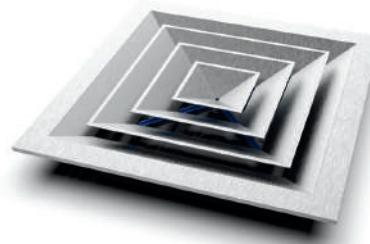

knowing the air volume and throw for each diffuser in question then check :

Recommended limit of air flow rate for each diffuser direction according to ceiling height (table CD-02) with throw of air required lying between the max. and min. values.

Note Noise Level from performance data diagrams and check the same with Noise Level recommendations table.

Determine the total pressure drop from performance data.

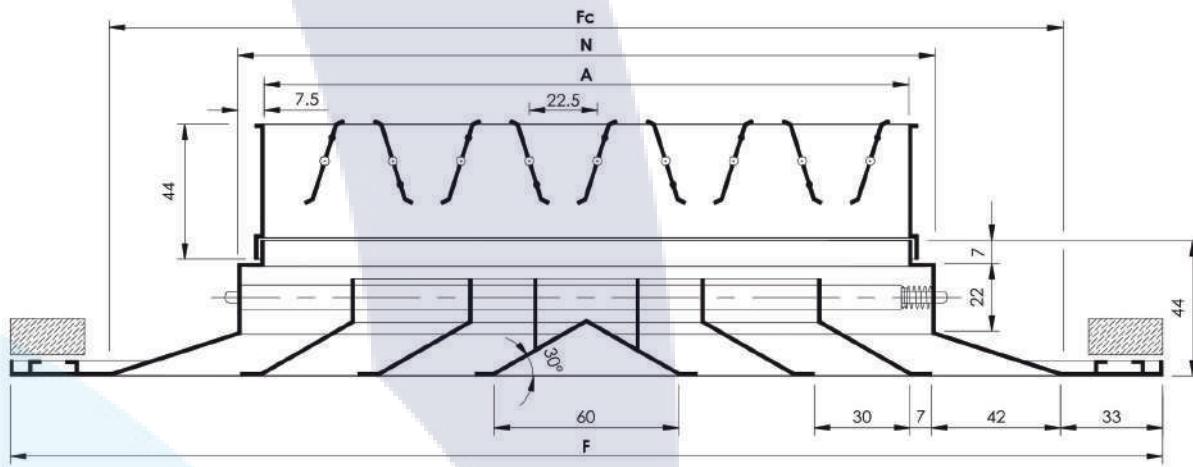

Ceiling Height (m)	Max.flow rate for each diffuser direction (L/s)	Max.flow rate for each diffuser direction At (°C)
2.5	100	1
3.0	200	13
3.5	350	15
4	500	16

Louvered face , multi directional with removable co

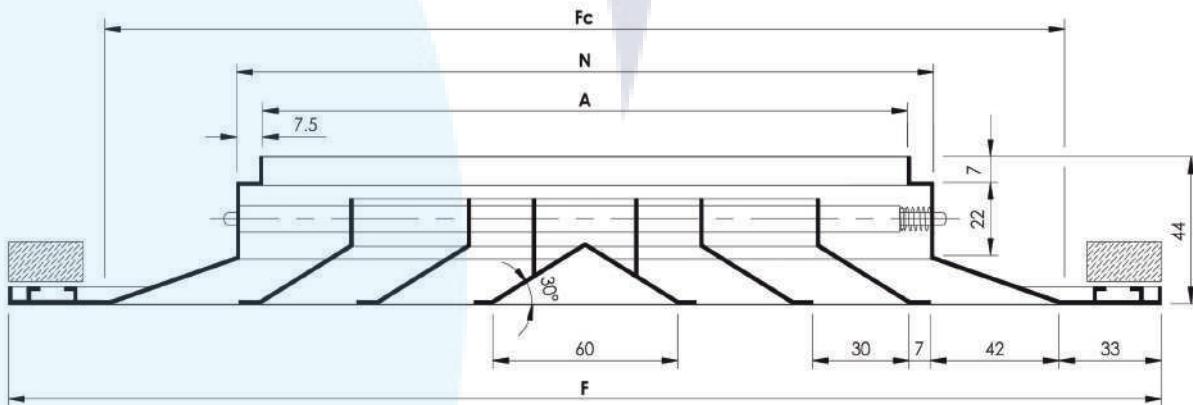

Square Diffusers - Model 4WS Construction and Dimensional Details

Supply Air Diffuser c/w Opposed Blade Damper , Model SAD 4WS

- Diffusers called Supply Air Diffuser and coded as **SAD** are always equipped with Opposed Blade Damper (provided as standard).

Return, Extract or Exhaust Air Diffuser w/o Opposed Blade Damper , Model RAD or EAD 4WS

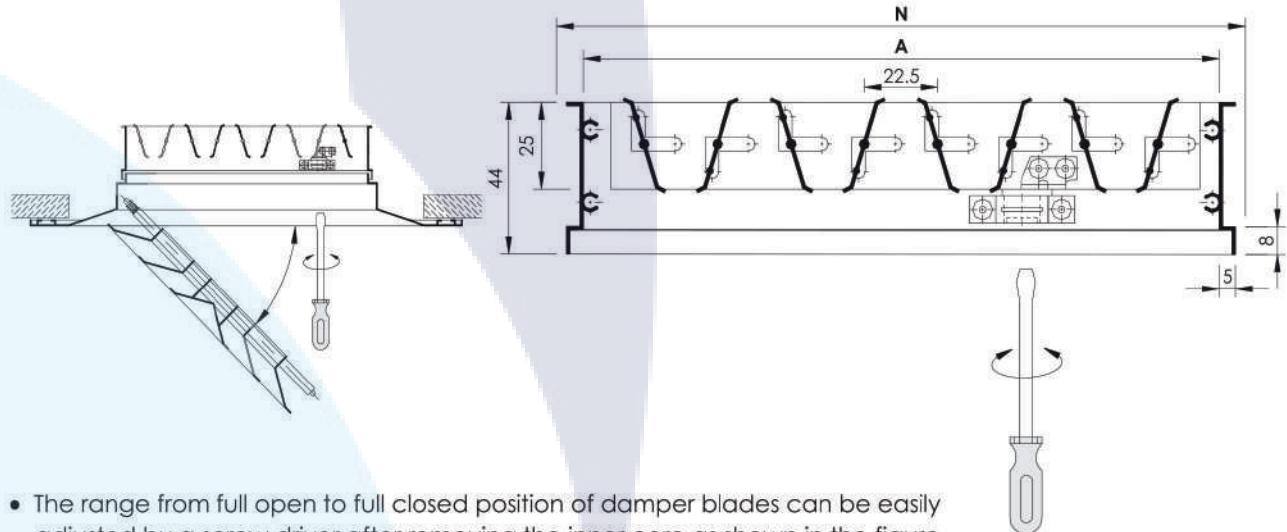

- Unless otherwise specified, Diffusers called Return, Extract or Exhaust Air Diffuser and coded as **RAD** or **EAD** are usually supplied w/o Opposed Blade Damper as a standard.
- In some cases **RAD** or **EAD** are required with Opposed Blade Damper, this will be provided as an option.
- All dimensions are in mm and subject to ±1 mm tolerance.

Diffuser Accessories

A. Opposed Blade Damper

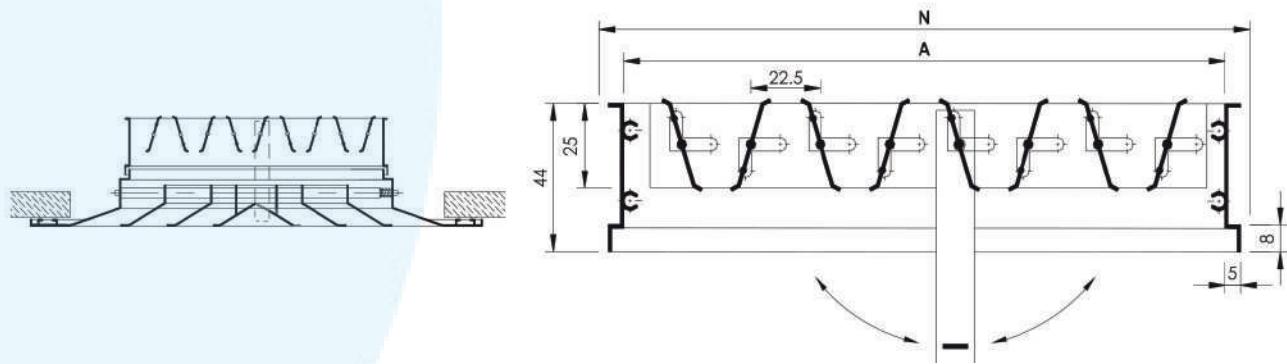

- Frame and Blades are of high quality Extruded Aluminium Profiles construction.
- Blades are designed to rotate opposite to each other.
- The specially designed blades have an overlapping lip which assures a tight closure.
- Generally, the opposed blade damper is attached to the diffuser and fixed to it by means of " S " clips.
- Blades are separated from its frame by nylon bushes. This method of assembly provides maximum rattle - free performance and eliminates corrosion.
- Usually damper standard surface finish is Aluminium in Mill Finish. Matt black powder coating color is also available on request (as an option).

Opposed Blade Damper - Screw Type Operation (Standard)

- The range from full open to full closed position of damper blades can be easily adjusted by a screw driver after removing the inner core as shown in the figure.

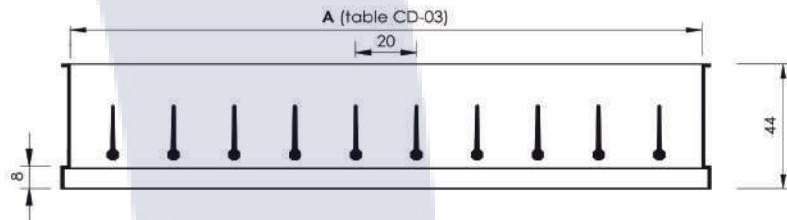

Opposed Blade Damper - Lever Type Operation (Optional)

Diffuser Accessories

B. Equalizing Grid (Optional)

- Frame and Blades are of high quality Extruded Aluminium Profiles construction.
- The aerofoil blades are separated from its frame by nylon bushes.
- Usually standard surface finish is Aluminium in Mill Finish. Matt black powder coating color is also available on request (as an option).
- For further details, refer to page no. CD-05.

All dimensions are in mm and subject to ± 1 mm tolerance.

C. Foam Type Rubber Gasket (Optional)

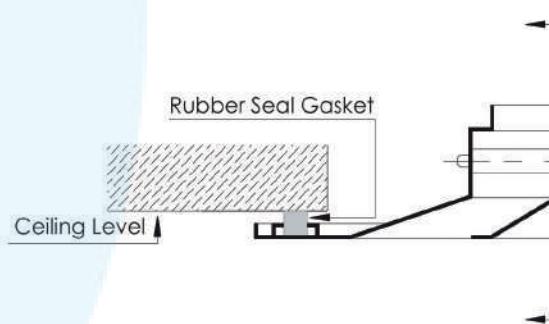

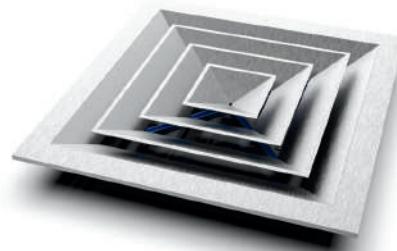

Gasket Type : Single Sided Self - Adhesive Foam.

Gasket Function : Sealing.

Gasket Benefits :

- Stops diffuser rattling.
- Minimize air infiltration.
- Stops leaks and pressure losses.
- Takes up unevenness of ceiling.
- Easy to apply on site or in factory.

- To be applied around the perimeter of the back side of the diffuser to act as an air seal to prevent pressurised air from escaping from the sides of the diffuser when fixed to the ceiling.

AC GRILLS

GRILLS AND REGISTERS

This type of air outlets are the most desirable for the side wall locations. Since they are available with both horizontal and vertical adjustable blades, minor air motion problems can be simply corrected by adjusting the vanes. They are distinguished by their high construction quality, low pressure drops and contained sound levels. Blades can be singularly oriented.

Features & Characteristics :

- Construction : Frame & blades are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Blades : Aerofoil design with 20 mm center spacing as standard.
- The frame is assembled by punching it's four corners by means of G. I. Angles which together create a very robust construction.
- Available in wide variety of standard neck sizes ranging from 300 x 150 up to 1200 x 300 mm in 50 mm increments (other Non-Standard sizes are available on request).
- Both the Grilles and Registers are available in single or double blades deflection on which provides air deflection in horizontal and / or vertical planes.
- Blades are individually adjustable to any degree of deflection by hand without the use of special tools.
- Maximum effective areas can be obtained when the blades are setted at 0 ° deflection.
- Blades are separated from it's frame by nylon bushes. This method of assembly provides maximum rattle-free performance and eliminates corrosion.
- A large free effective area grilles can be obtained by using an Eggcrate core with 90% Free Area, see page No. GR-09.
- Grilles combined with Opposed Blade Dampers are called Registers.
- Accessories : see page No. GR-10 & 11.
- Available Fixing Mounting : see page No. GR-12.
- Surface Finishes : see page No. GR-34.

Model ECG + F

Eggcrate Core Design

- The Eggcrate grilles with Aluminium Eggcrate mesh are normally used for the return and recirculation of air inside offices, living areas, commercial centres,..... etc.
- The Particular design of the Eggcrate central core of 13 x 13 mm opening permits the use of a large free surface area (90 % Free Area) without turbulence.
- The Eggcrate grille frame with the channel border is used to fix the central core.
- In respect to traditional grilles with inclined or fixed blades, it's possible to reduce the grilles dimensions while maintaining equal performances, or reduce noise level and pressure drop while maintaining equal dimensions and air flow.
- Eggcrate grilles can be mounted either horizontally or vertically (ceiling or side wall) without affecting their aesthetic form or performance.
- The Eggcrate grilles are available with standard accessories such as Opposed Blade Damper or Aluminium Washable Filter Media of 1/2 " thickness.

N : Nominal>Listed Size = Length (L) x Height (H)

A : Actual Size = (L-10) x (H-10)

F : Face Size = (L+50) x (H+50)

• Eggcrate Grilles / Registers furnished approximately 10 mm less than the Nominal>Listed Size.

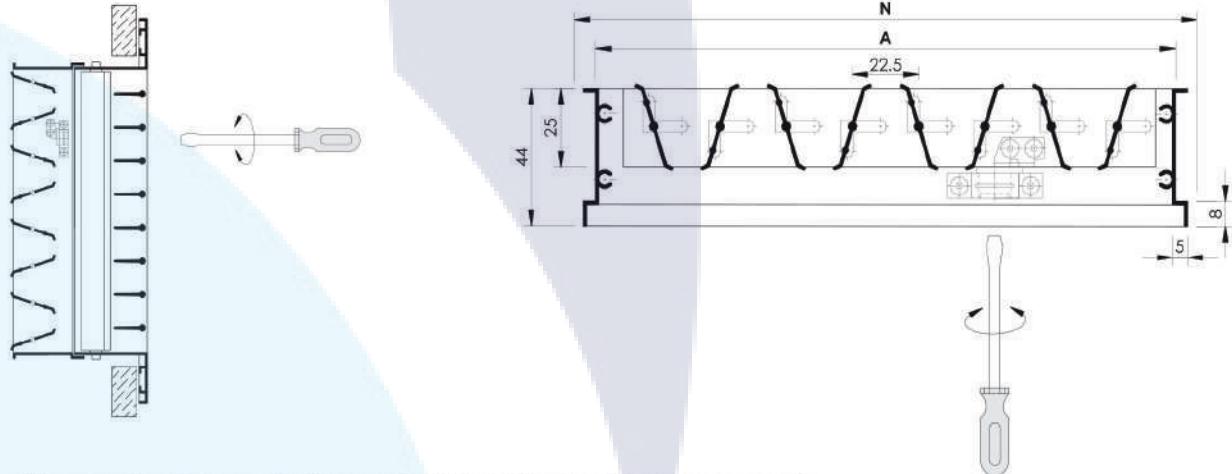

• All dimensions are in mm and subject to ±1 mm tolerance.

Grilles and Registers Accessories

A. Opposed Blade Damper

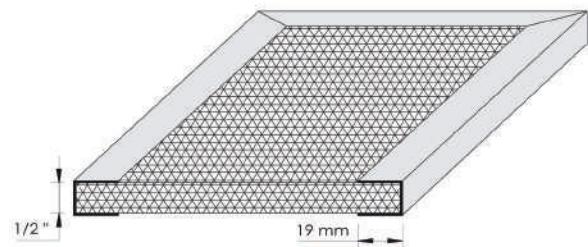

- Frame and Blades are of high quality Extruded Aluminium Profiles construction.
- Blades are designed to rotate opposite to each other.
- The specially designed blades have an overlapping lip which assures a tight closure.
- Generally, the opposed blade damper is attached to the grille and fixed to it by means of " S " clips.
- Blades are separated from its frame by nylon bushes. This method of assembly provides maximum rattle - free performance and eliminates corrosion.
- Usually Damper standard surface finish is Aluminium in Mill Finish. Matt black powder coating color is also available on request (as an option).
- Screw type operation.

- The range from full open to full closed position of Damper blades can be easily adjusted by a screw driver accessible from the face of the register as shown in the figure.
- All dimensions are in mm and subject to ± 1 mm tolerance.

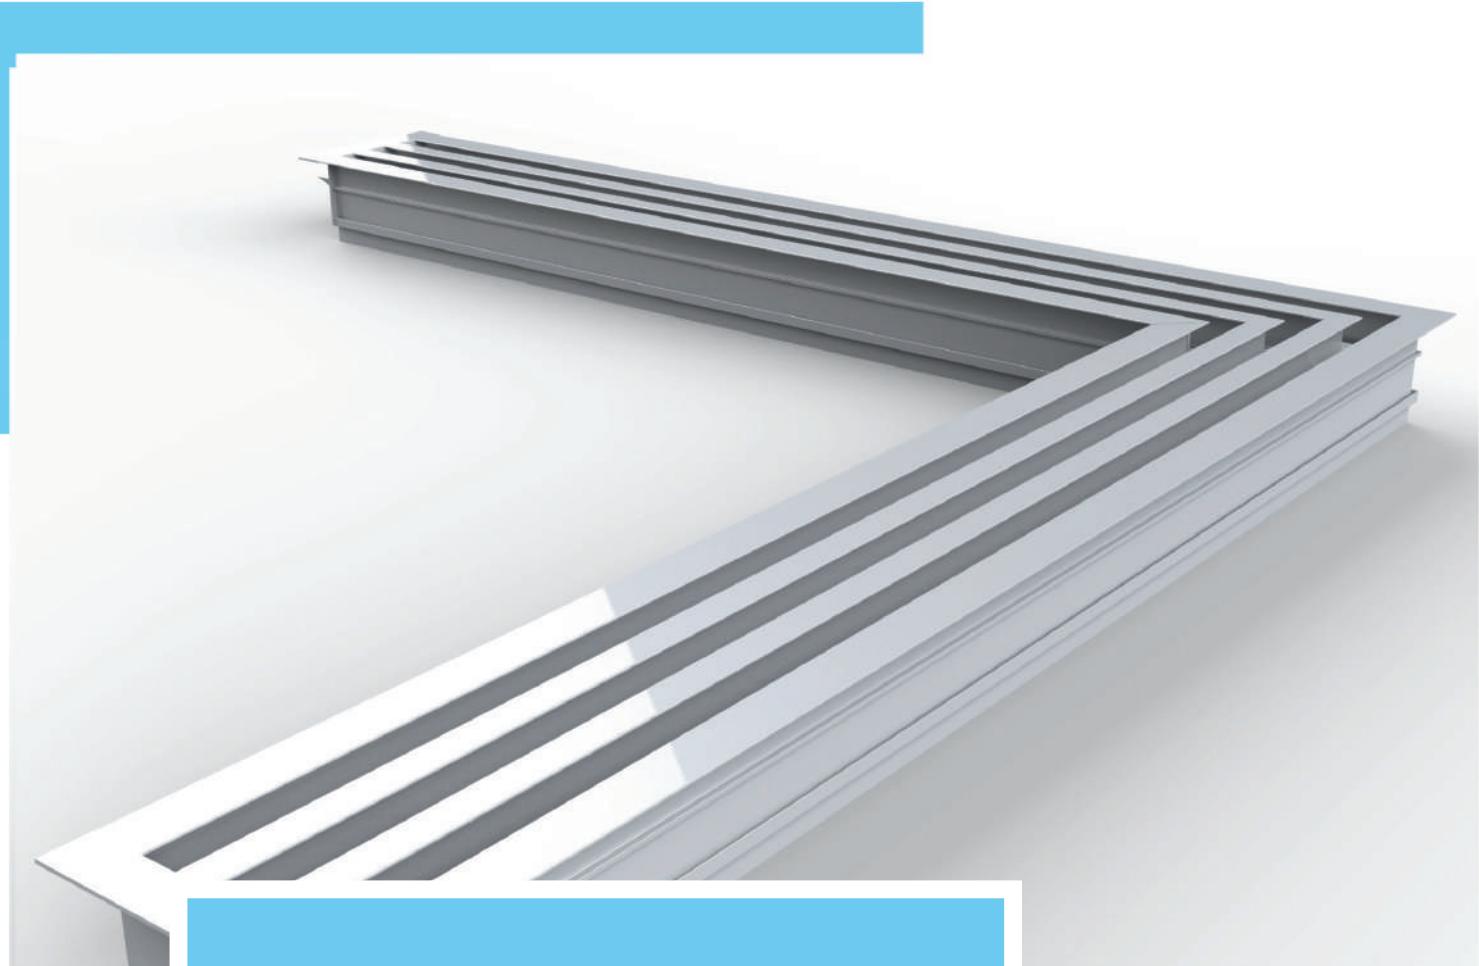

B. Aluminium Washable Filter

- Construction : Consists of expanded metal Aluminium mesh with unique pattern.
- Application : For collection of big particles of dust. It's used for corrosive atmospheres.
- Features : High dust holding capacity, low resistance filters. It can be cleaned with regular water and live longer life.
- Filter Thickness : Standard 1/2" thickness provided with Aluminium Profiled U - Channel Frame of 19 mm width.

AC GRILLS

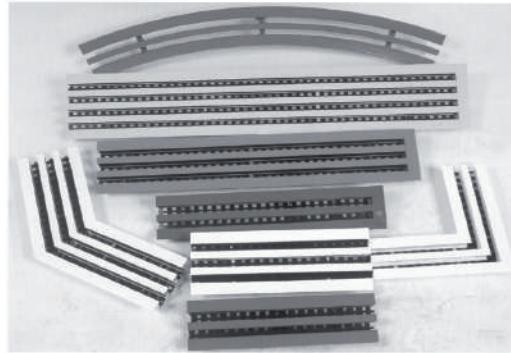

LINEAR SLOT DIFFUSERS

Linear Slot Diffuser have been designed to satisfy architectural concepts that require continuous length applications without compromising air distribution performance. A combination of engineering excellence and architectural appeal in a single product is provided in this type of units.

Linear Slot Diffusers for supply air applications are usually installed in ceilings or high side wall locations, the design of these units features an adjustable supply air pattern and makes them particularly suitable for open office perimeter zones, main floor entrance foyers and lobbies, elevator lobbies, conference rooms, mall atriums and theatres.

Features & Characteristics :

- Construction : Frame, Core & Deflection Blades are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Hit - and - Miss Damper Material : made of Prepainteted Aluminium coils of 3005 Alloy in matt black color finish.
- Frame Flange Width : 28 mm .
- Available in 1 to 8 Numbers of Slots.
- Available in three different slot widths (openings) :
 - 20 mm (3/4 ") as standard.
 - 16 and 25 mm (5/8 " and 1") as option.
- The design of linear slot diffusers provides a full flexibility in volume and air pattern control.
- The Volume Control Damper (Hit - and - Miss Damper) installed in the rear part of the linear slot diffuser consists of two Aluminium strips, the rear one is fixed and the other one is sliding.
- Both the Hit and Miss strips are having 10 x 10 mm square holes. Adjacent holes are spaced in 10 mm distances also.
- Manually and from the slot face opening, the air flow rate can be adjusted by moving the sliding part of the Hit - and - Miss damper left or right.
- The Volume Control Damper (Hit - and - Miss Damper) is designed in a unique way that it can be used as an equalizing grid.
- Air pattern can be directed vertically or horizontally by means of Deflection Blades in fully 180 ° range without changing the air flow rate. These blades can be manually adjusted from slot face opening.
- The Adjustable Deflection Blades allow for the air pattern to be directed along the ceiling , straight down or at some intermediate setting.
- To maintain perfect and unbroken appearance for continuous runs, alignment joining strips are provided in proper lengths and quantities with no extra cost.
- Also, End Cap pieces to be provided in proper sizes as requested with no extra cost.
- Mounting Instructions : see page No. LD - 06.

sales.duct@sammangroup.com

AC GRILLS

LINEAR BAR GRILLS AND REGISTERS

The fixed Bar Grilles / Registers are used satisfactorily in locations where flow direction is not critical or can be predetermined. The Linear Grilles / Registers with fixed horizontal bars satisfy the architectural requirements of large areas where continuous input along the walls is requested for wall mounted installations, windowsill and covering furniture for fan coils.

Features & Characteristics :

- Construction : Frame & Face bars are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Face Bars (core style) : available in two different bar deflections, the standard one is the 15 ° - 2 way deflection and the optional one is the 15 ° - 1 way deflection (see table No. LG - 02).
- Bar Spacing : Spacing of the adjacent fixed bar blades are set at 12 mm as standard. Also available in 9 and 6 mm spacing as an option (see table No. LG - 02).
- Available with vertical Aluminium aerofoil rear blades fixed to the frame by means of nylon bushes. These blades can be adjusted manually and individually in the vertical plane to achieve the optimum throw deflection and air distribution.
- The frame is assembled by punching it's four corners by means of G. I. Angles which together create a very robust construction.
- For Continuous runs, units are supplied in sections and can be designed to incorporate additional features such as active / dummy sections and mitered corners (see table No. LG - 03, 04, 05 & 06).
- To maintain perfect and unbroken appearance for continuous runs, alignment joining strips are provided in proper lengths and quantities with no extra cost.
- Available in wide variety of standard heights ranging from 50 mm neck size up to 300 mm in 50 mm increments (other none standard sizes are available on request).
- Linear Bar Grilles combined with Opposed Blade Damper are called Linear Bar Registers.
- Mullion Pipes across the fixed bar blades provide additional strength and rigid construction. These Pipes are placed at a distance of 300 mm maximum from each other.
- Accessories : see page No. LG - 07.
- Available Fixing Mounting : see page No. LG - 08.
- Surface Finishes : see page No. LG - 13.

AC GRILLS

LINEAR BAR GRILLS AND REGISTERS

Linear Bar Grilles and Registers Accessories

A. Opposed Blade Damper

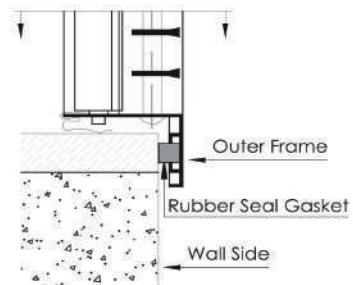

- Frame and Blades are of high quality Extruded Aluminium Profiles construction.
- Blades are designed to rotate opposite to each other.
- The specially designed blades have an overlapping lip which assures a tight closure.
- Generally, the opposed blade damper is attached to the linear bar grille and fixed to it by means of " S "clips
- Blades are separated from its frame by nylon bushes. This method of assembly provides maximum rattle - free performance and eliminates corrosion.
- Usually Damper standard surface finish is Aluminium in Mill Finish. Matt black powder coating color is also available on request (as an option).
- Screw type operation.

- The range from full open to full closed position of Damper blades can be easily adjusted by a screw driver accessible from the face of the linear bar register as shown in the figure.
- All dimensions are in mm and subject to ±1 mm tolerance.

B. Foam Type Rubber Gasket (Optional)

- Gasket type : Single Sided Self - Adhesive Foam.
- Gasket Function : Sealing.
- Gasket Benefits :
 - Stops Linear Bar Grille / Register rattling.
 - Minimize air infiltration.
 - Stops leaks and pressure losses.
 - Takes up unevenness of ceiling.
 - Easy to apply on site or in factory.
- To be applied around the perimeter of the back side of the Linear Bar Grille/Register to act as an air seal to prevent pressurised air from escaping from the sides of the outer frame when fixed to the wall.

AC GRILLS

LINEAR BAR GRILLS AND REGISTERS

The perforated Diffusers Provide a modern silent and draft-free range of diffusers designed to blend effectively with modern ceiling styles and profiles. Offering excellent uniform air distribution patterns the unit comprises of an extruded aluminium frame with a perforated steel sheet face, 50 % free area, and square cones (core) concealed behind the perforated face positioned to give 4, 3, 2 or 1 way discharge as required for the supply units. While return, extract or exhaust units are normally supplied without this feature for straight forward extract application.

These diffusers have high diffusion induction rates, resulting in rapid temperature and velocity equalization of the mixed air mass before the supply air enter the occupied space.

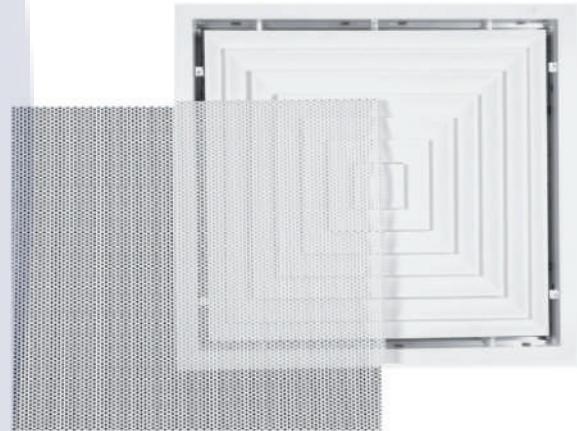

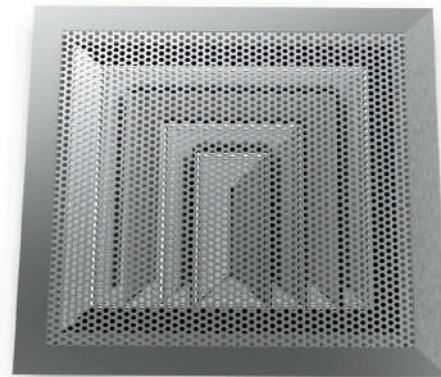

As an alternative use also, the perforated diffusers have been designed to meet architectural requirements as to appearance, module size or other aesthetic considerations.

Features & Characteristics :

- Construction : Frame & inner cones (core) are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Perforated Face : made of G.I. Perforated sheet of 0.8 mm thickness with 4 mm Ø perforation at a pitch of 6 mm to produce 50 % free area.
- Units are flush mounted available with different pattern arrangements 4,3,2&1way (i.e. different ways of air discharge directions).
- Available in wide variety of square neck sizes ranging up to the most popular used 600 x 600 mm module with 595 x 595 mm outer frame size making it suitable for standard false ceiling panel replacement.
- The perforated screen shall be removable from the diffuser face and fitted with screws to facilitate the removal of face screen to provide easy access to :
 - Installation.
 - Adjustment of key operated OBD.
 - Maintenance and cleaning.
 - Core exchange by different pattern in future.

The core is held in place and fixed to the frame by two loaded spiral galvanized steel springs.

- For a better supply air mixing, increase of throw and induction, more sound containing and easy connection to duct system, G.I. Neck adaptor is available as an option.
- Perforated diffusers project from the mounting surface by 5 mm.
- Accessories : see page No. PD-03.
- Mounting Instructions : refer to page No. CD-09, Chapter (1).
- Surface Finishes : see page No. PD-05.

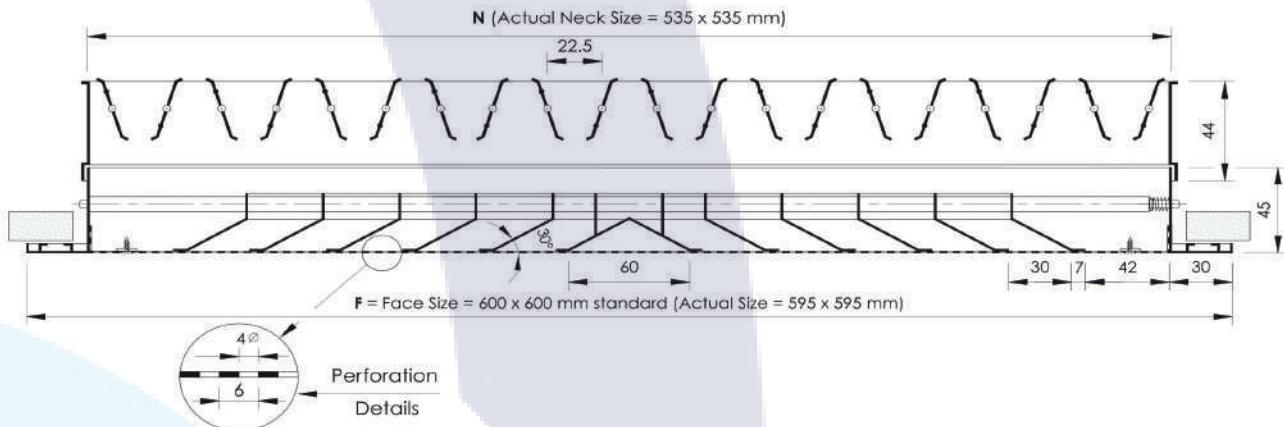

AC GRILLS

LINEAR BAR GRILLS AND REGISTERS

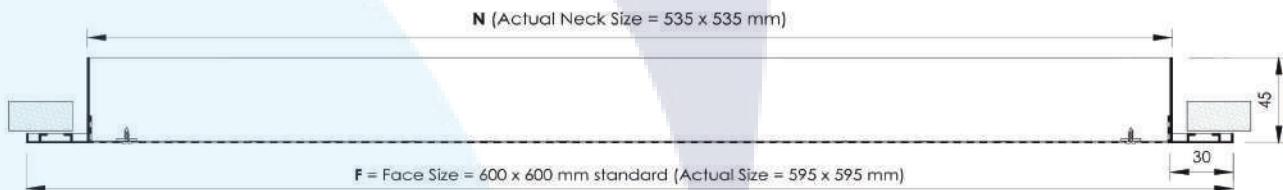

Models Construction and Dimensional Details

Model PSCD 4WS , Standard Module 600 x 600 mm Face Size

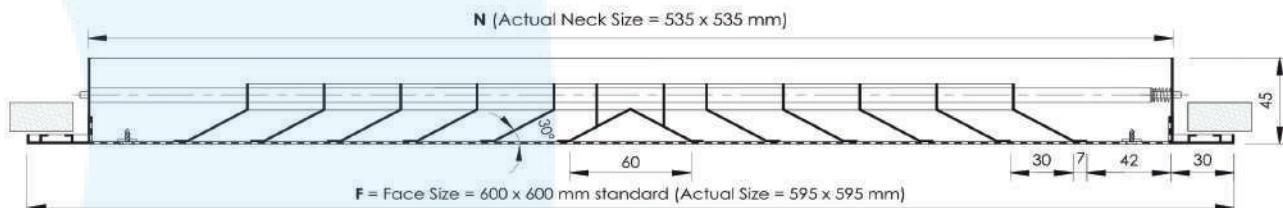

- Diffusers called Perforated Supply Ceiling Diffuser and coded as **PSCD 4WS** are always equipped with 4 - Way Square Pattern and Opposed Blade Damper (provided as standard).

Model PRCD W/O CORE , Standard Module 600 x 600 mm Face Size

- Unless otherwise specified, Diffusers called Perforated Return, Extract or Exhaust Ceiling Diffuser and coded as **PRCD W/O CORE** are normally supplied w/o inner core and Opposed Blade Damper as standard to ensure straight forward extract application.

Model PRCD 4WS , Standard Module 600 x 600 mm Face Size

- In some cases, Return, Extract or Exhaust Perforated Ceiling Diffusers are required with inner core (4 way pattern), this will be supplied on request only as an option and coded as **PRCD 4WS**.
- Other sizes and models are available on request.
- All Dimensions are in mm and subject to ± 1 mm tolerance.

AC GRILLS

DOOR TRANSFER GRILLS

Door transfer Grills of the DG Model are particularly designed to allow the passage of air from a conditioned space to another while preventing vision. They are widely used, not only in doors, panels or partitions, but also in places of conventional exhaust and return air grilles where it's required that the interior of the duct be hidden.

Features & Characteristics :

- Construction : Frame & blades are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Blades : Inverted " V " horizontal cross section louvers arranged to overlap each other to be " Sight - Tight " when viewed from any angle.
- Blades pitch : blades are spaced at a distance of 20 mm.
- The inverted " V " louver cross section not only blocks vision, but also provides additional strength and rigid construction.
- Available in wide variety of standard neck sizes ranging from 200 x 100 up to 1200 x 500 mm (other None – Standard Sizes are available on request).
- Telescopic frame suitable for doors or partitions from 25 – 55 mm thick (Fixed on both sides of the door).
- The frame of the Door Transfer Grille is composed of two parts, one part is the fixed one, holding the core and can be fixed to one side of the door or partition. While the other part, the sliding one, is fixed to the other side of the door or partition. Thus the sliding frame gives the facility of installing this grille to different thicknesses of doors or partitions.
- The large free area (up to 70 %) is capable of transferring high air volumes at minimum pressure loss and noise level.
- The frame mounting holes are dimpled, allowing for a counter-sunk fastener head appearance.
- Available with Foam type Rubber Gasket for air sealing (provided as an option).
- Mounting instructions : see page No. DG – 03.
- Surface Finishes : see page No. DG – 05.

+966 597510438

sales.duct@sammangroup.com

AC GRILLS

EXHAUST & FRESH AIR LOUVERS

The Aluminium Exhaust and Fresh Air Louvers are used both internally and externally in buildings for the extraction of re - cycled air, intake of external fresh air or the expulsion of contaminated air. The quality of the material used and the particular inclination of the blades at 60° angle downward offer a weather resistant Louvers which gives good protection against the direct ingress of rain water, leaves and birds. Can also be used directly installed on walls for the ventilation of industrial areas. Also suitable for the use with an adjustable or overpressure damper for air flow and pressure control.

Features & Characteristics :

- Construction : Frame & blades are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Blades : Fixed Louverd type arranged horizontally and inclined downward to 60 ° angle in order to :
 - prevent the ingress of rain water.
 - Prevent the ingress of light.
 - Block vision while straight viewing.
 - Be suitable for external walls and screening applications.
- The blades are positioned on 25 mm minimum centers up to 35 mm maximum centers resulting in a high free area to provide minimum resistance to air flow.
- Available in wide variety of neck sizes with 100 x 100 mm minimum single section size and 2 mtr maximum single section height. Louvers height exceeding 2 mtr to be fabricated and supplied in multiple sections depending on length and height dimensions as well as site conditions.
- The assembly of multiple sections is unlimited, where each section operates independently.
- Multiple sections : Supplied as separate sections and assembly by others on site.
- The Fresh Air Louver is suitable for the use in air inlet of fresh air ducts and air handling units. It's also suitable for the use at dirty air exhaust discharge.
- Wire Mesh screen of galvanized steel is attached to the interior face of the louver as an option, mesh size 3 x 3 mm.
- Exhaust Air Louvers are available with different type of attachments such as :
 - Opposed Blade Damper (Model EAL + D).
 - Aluminium Filter (Model FAL c/w Filter).
 - Both the Damper and Filter (Model FAL + D c/w Filter).
- Available with Foam type Rubber Gasket for air sealing (provided as an option).
- Mounting instructions : see page No. EL-04
- Surface Finishes : see page No. EL-08.

+966 592995120
+966 597510438

sales.duct@sammangroup.com

AC GRILLS

GRAVITY LOUVERS & NON RETURN DAMPERS

Gravity Louvers **GL** and Non Return Dampers **NRD** are generally used in intake and discharge applications in residential, commercial and industrial ventilated systems. GL's and NRD's guarantee that the automatic opening of the blades will occur when the fan or system is switched on and equally will close when switched off in order to avoid passage of air when the system is closed, i.e preventing the reverse of air flow. They are also used to maintain certain pressure in pressurized treated areas with respect to others, thus only when pressure is exceeding the designed limit, blades will automatically open to discharge or relieve the excessive air. GL's and NRD's are also commonly named as "Pressure Relief Dampers", "Over Pressure Dampers", "Back Draft Dampers" or "Gravity Shatters" according to the purpose of their use.

Features & Characteristics

Gravity Louvers (GL) :

- Frame construction : made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame Flange width : 30 mm.
- Blades : fabricated from Aluminium sheet of 0.5 mm thickness.
- Aluminium Blades are fixed to the frame through a galvanized steel rods (axles) for rigid construction.
- Aluminium Blades are fitted with nylon bushes for corrosion resistance, rattle free and smooth operation.
- The blades are positioned on 45 mm minimum centers up to 100 mm maximum centers resulting in a high free area to provide minimum resistance to air flow.
- Available in wide variety of neck sizes with 100 x 100 mm minimum single section size and 2 mtr maximum single section height. Louvers height exceeding 2 mtr to be fabricated and supplied in multiple sections depending on length and height dimensions as well as site conditions.
- The assembly of multiple sections is unlimited where each section operates independently.
- Multiple sections : Supplied as separate sections and assembly by others on site.
- Usually used for external or internal wall mounting installations.

- Automatically, when the duct pressure is normalized, the blades drop to closed position by gravity effect.
- The specially designed blades have an overlapping lip which assures a tight closure while in closing position.
- Available with Foam type Rubber Gasket for air sealing (provided as an option).
- Mounting instructions : see page No GL 04

Non Return Dampers (NRD) :

- Casing construction : made of 18 or 20 gauge formed galvanized steel sheet.
- Casing Flange width : 25 - 30 mm (Model NRD – F).
- Blades : fabricated from Aluminium sheet of 0.5 mm thickness in mill finish.
- Aluminium Blades are fixed to the frame through a galvanized steel rods (axles) for rigid construction.
- Aluminium Blades are fitted with nylon bushes for corrosion resistance, rattle free and smooth operation.
- The blades are positioned on 50 mm minimum centers up to 100 mm maximum centers resulting in a high free area to provide minimum resistance to air flow.
- Available in wide variety of neck sizes with 100 x 100 mm minimum single section size and 2 mtr maximum single section height. Louvers height exceeding 2 mtr to be fabricated and supplied in multiple sections depending on length and height dimensions as well as site conditions.
- All joints are welded and sealed for air tight operation and protected by Aluminium spray paint.
- Available in 3 types / models according to casing design. Slip , Clip and Flange type as shown in page No. GL-03.
- Usually used for duct mounting installations.

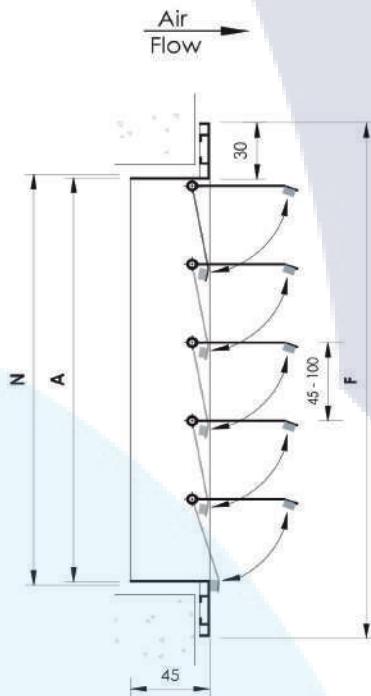

AC GRILLS

GRAVITY LOUVERS & NON RETURN DAMPERS

SAND TRAP LOUVERS

duct.sammangroup.com

+966 592995120
+966 597510438

sales.duct@sammangroup.com

AC GRILLS

SAND TRAP LOUVERS

The Sand Trap Louvers **STL** are designed for usage in serving as a Pre – Filter element in dusty and sandy zone conditions as well as to protect the entry to the external inlets of air conditioning or filtration ducting systems and walls. Blades are formed in U – Profiles placed alternately in vertical configuration. This particular configuration allows a sand and heavy dust separation at high performance rates. The drain holes placed in the lower part let the Louver be self emptying, self cleaning and maintenance free.

Features & Characteristics :

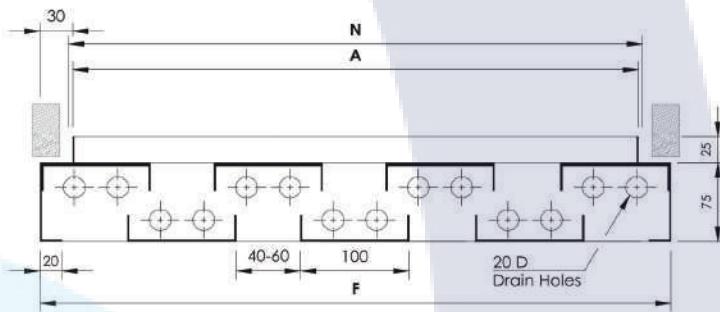

- Construction : Frame & blades are made of high quality Extruded Aluminium Profiles of 6063 Alloy.
- Frame and Blades general wall thickness : 1.5 – 1.8 mm and 1.2 – 1.5 mm respectively.
- Frame Flange width : 20 mm.
- Blades width : 100 mm.
- The vertically U – Inverted blades are assembled in a double bank opposite style configuration which enables the unit to fulfill the requirements for not only a sand or dust filtration but also being a standard weather resisting assembly.
- Flush Mounted Sand Trap Louver type (Model FSTL) is also available. It's convenient to fix on the same plane of the wall with a sand chute tray fixed and inclined at the lower part of the Louver (suitable for all external wall installations).
- Since the STL is only a Pre-Filter unit, it's not recommended to be used alone in a system.
- The adjacent blades are positioned on 40 mm minimum spacing up to 60 mm maximum spacing providing maximum separation of sand or dust from inlet air at low air velocities, thus avoiding excessive dust loading of conventional filters.
- The lower part of the Louver frame contains of 20 mm drain holes arranged in two parallel row for emptying the captured sand or dust.
- Available in wide variety of neck sizes with 150 x 150 mm minimum single section size and 2 mtr maximum single section height. Louvers height exceeding 2 mtr to be fabricated and supplied in multiple sections depending on length and height dimensions as well as site conditions.
- The assembly of multiple sections is unlimited where each section operates independently.
- Multiple sections : Supplied as separate sections and assembly by others on site.
- As a standard, the STL.'s are always provided with Bird Screen (Bird Guard) of galvanized steel with 12 x 12 mm grids attached behind the frame to prevent large flying objects and animals to pass through the system. Also available with Insect Screen as an option (on request).
- Sand Trap Louvers are available with different type of attachments such as :
 - Aluminium Filter (Model STL + F).
 - Opposed Blade Damper (Model STL + D).
 - Both the Filter and Damper (Model STL + F + D).
- Mounting instructions : see page No. SL-05.
- Surface Finishes : see page No. SL-09.

AC GRILLS SAND TRAP LOUVERS

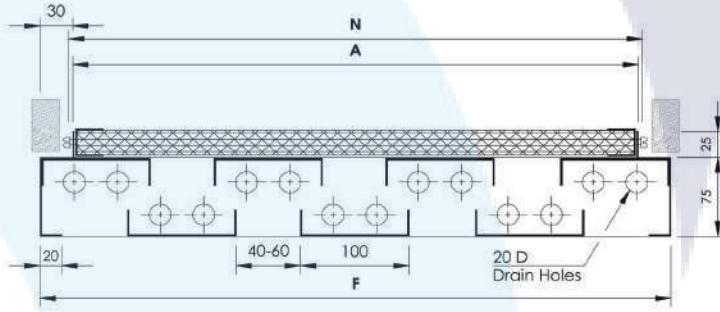

Sand Trap Louvers Construction and Dimensional Details

+966 597510438

sales.duct@sammangroup.com

AC GRILLS DISC VALVES

Disc / Air Valves are a pleasing terminal device which contains good appearance with a very accurate control over supply or exhaust air volumes.

The Disc Valves have been designed to provide a compact, clean and attractive means to ventilate (supply or exhaust) bathrooms , toilets, wash rooms, kitchens and other small rooms.

Features & Characteristics :

- Construction : outer ring and inner disc are manufactured from steel sheet and finished in durable white powder coating color to RAL – 9010 as standard.
- Fixing Collar or Mounting Ring is manufactured from galvanized steel sheet and supplied as a standard with no extra cost.
- Sponge Gasket : provided around the back side of the outer ring as a standard with no extra cost.
- They can provide relatively high air volumes whilst retaining good diffusion and low noise and pressure drop characteristics.
- The inner disc (core) is fully adjustable, its connected to the outer frame by threaded rod for accurate and easy adjustment.
- Fixing is obtained by twisting the valve body into the fixing collar until attaining a perfect seal utilizing the gasket provided.
- Valve adjustment is achieved by simply rotating the inner disc (core) inwards or outwards on its spindle and locking into its set position using the holding nut at the rear of the valve assembly.
- Mounting Instructions : see page No. DV-03.
- Surface Finishes : see page No. DV-07.

Circular Ceiling Diffuser (Fixed Core)

Model CSCD C/W BFD (FIXED CORE)

This model of circular Diffuser is totally different in its design, construction & concept from our one mentioned in chapter # 10. In this model core (Inner cones) is :

- Fixed.
- Flushed to the frame.
- Can't be adjusted vertically up or down.
- But still removable from the face.

Each diffuser already equipped with ABS (plastic) butterfly damper in black color as standard.

Features & Characteristics :

- Frame & inner cones (core) are made of high quality Aluminum sheet pressed to give the circular shape.
- Damper (Butterfly type): made of ABS (plastic) in black color.
- The inner cones (core) are designed in conical shape, modern styling & easy removable allowing for easy installation, balancing, cleaning, damper adjustment & access to duct system.
- Available in 5 standard sizes ranging from 150 mm to 350 mm Ø in 50 mm increments.
- Provided with standard sealing sponge gasket fixed backside of each diffuser.
- Provided with G.I. assembly bridge & screws for easy installation.
- Good for installations between 2.6 to 4.1 mtr height.

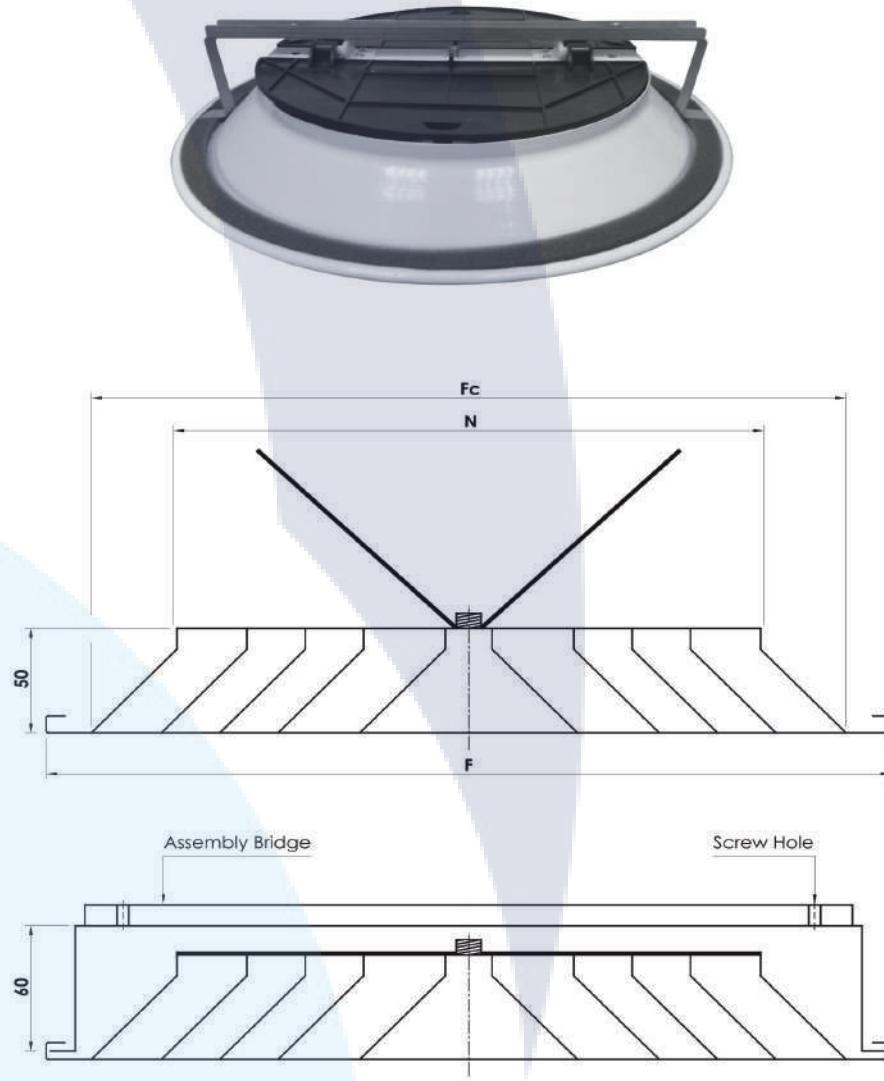

OPERATING RANGE & QUICK SELECTION TABLE

Nominal Neck size (N)		CFM Range
mm	Inch	
150 Ø	6" Ø	60 to 200
200 Ø	8 " Ø	120 to 320

300 Ø	12" Ø	401	353	5
350 Ø	14" Ø	452	404	6

- All Dimensions are in mm and subject to ± 2mm tolerance.

Jet Nozzle Diffuser (Ball Type)

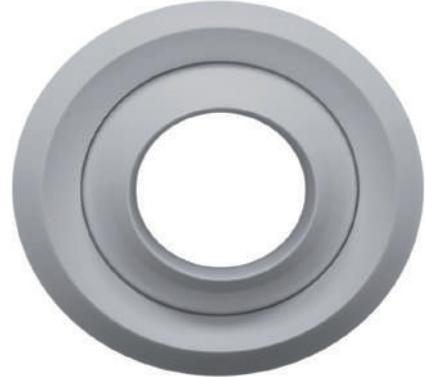

Model : JET NOZZLE DIFFUSER (BALL TYPE)

The ball type Jet Nozzles with variable diffusion directions are particularly designed for Air Conditioning systems which require long concentrated throws in order to reach areas which are distant from the duct system or hidden by structural elements.

Jet Nozzles of ball type can be utilized for both vertical & horizontal air diffusion, thanks for their easy orientation in all directions around 360°, also the minimum construction tolerance & an accurate smooth finish of the spherical body together with its surrounding ring guarantees easy & precise movement.

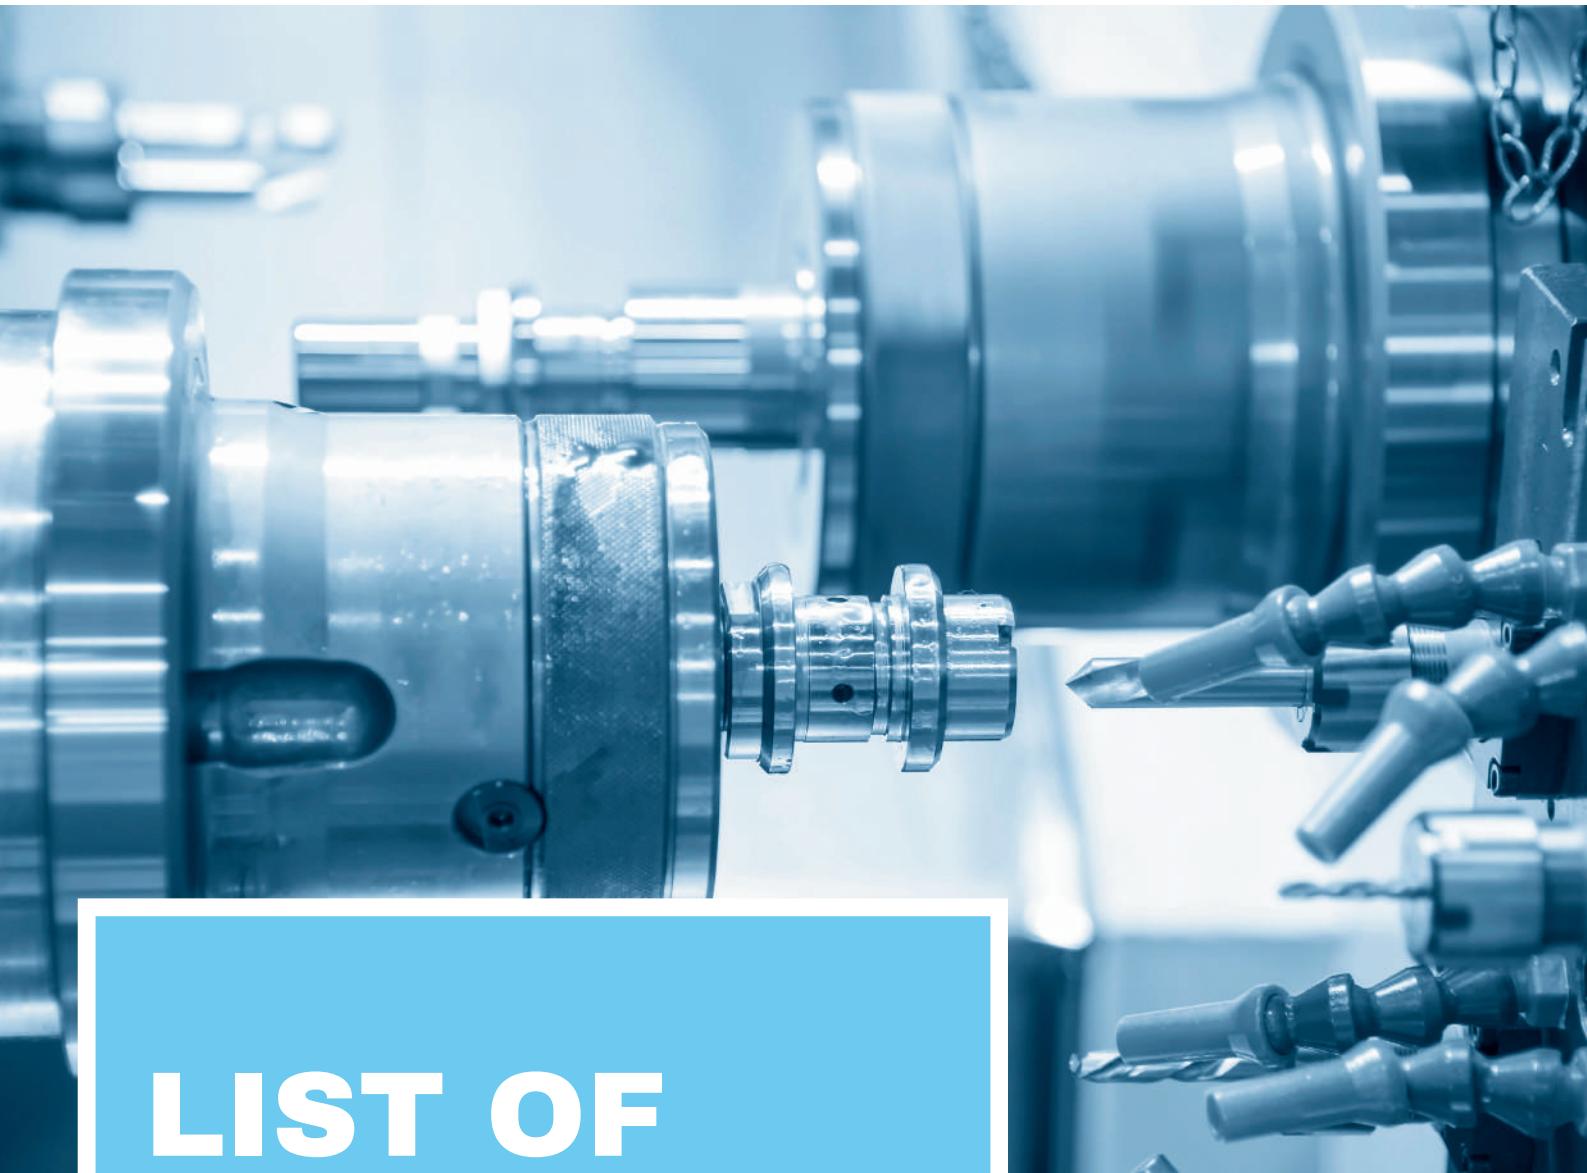

Features & Characteristics :

- Spherical body & its ring are made of high quality Aluminum sheet pressed to give the ball shape.
- The ball can be oriented around 360°.
- Fixing ring is provided with holes for easy screw installation.
- An extra covering ring is provided to conceal the fixing screws (turning this ring clockwise is only what you need to fit it in place).
- The built in circular neck provided at the backside of each diffuser allows for easy connection to flexible duct.
- A double felt seal between the ball body & its ring permits a perfect seal & a self locking position once desired angle has been chosen.
- Available in five standard sizes 150, 200, 250, 315 & 400 Ø mm.
- Good for installations between 2.8 to 30 mtr height.

11	Folding machine - Keetona	مكينة انثناء وقف (قطع) او ترميمية	MSC - 010	Folding of C & S Drive Cleat Ducts, and General Folding of Sheet Metal works	Up to 1.5mm Thick	Keetona	HUD 818709	UK	1	Enough Capacity to Support Coil Line & Daily Production	
12	Folding machine - Morgan Manual Folder	مكينة تقطيع قهقرية	MSC - 011	Folding of C & S Drive Cleat Ducts, and General Folding of Sheet Metal works	Up to 1.5mm Thick	Morgan, Rushworth LTD		UK	1	Enough Capacity to Support Coil Line & Daily Production	
13	Power Folding Machine - Forst	مكينة تقطيع اوتوماتيك	MSC - 012	Folding of C & S Drive Cleat Ducts, and General Folding of Sheet Metal works	Up to 1.5mm Thick	Frost		UK	1	Enough Capacity to Support Coil Line & Daily Production	
14	Press Brake - Adira	مكينة اوتوماتيكية تقطيع بروابا معدنة	MSC - 013	For manufacturing VCD Blades, and General bending of Sheet Metal works	Up to 2.00 mm Thick, 3 meter Long	Adira		UK	1	10 Strokes Per Minute	
15	Press Brake - Barnes	مكينة اوتوماتيكية بروابا معدنة	MSC - 014	For manufacturing VCD Blades, and General bending of Sheet Metal works	Up to 2.00 mm Thick, 1.2 meter Long	Barnes		UK	1	10 Strokes Per Minute	
16	RAS Seam Locking Machine	مكينة غلاق وفتح الصاج	MSC - 015	For Making Double Groove Longitudinal Seam, and to Complete the Rectangular Duct Seam Closing	Up to 0.80mm Thick, and a Duct Size Up to 1000mm	Ras		UK	2	Closes 25 Longitudinal Seam Per Hour/700 Sqmt of Rectangular Ducting Per Day, with each Machine	

LIST OF MACHINERY

No.	Name of Machine	اسم الماكينة	Machine No.	Nature of Work	Product Range	Make	Model	Country of Origin	Quantity	Capacity/Day	Units
17	RAS Seam Locking Machine	ماكينة إغلاق ووجع حرف الصاج	MSC - 016	For Making Double Groove Longitudinal Seam, and to Complete the Rectangular Duct Seam Closing	0.6-1.0	Germany		Germany	2	One Duct Per Minute	
18	Standing S Cleat Machine	ماكينة عمل سطويات (الطبع الناشر بالشكل رأسى و اس بشكيل رأسى و عدواني)	MSC - 017	Preparing Standing S Cleat	06-0.8	China		China	1	10 Meters / Minute	
19	Beading Machine	مكينة تفريج (أروق)	MSC - 018	Making of Beading for the Plasma Made Pieces	05-1.5	China		China	1	Supports the daily production schedules	
20	TDC Folding Machine	مكينة تفريج بعلق دبرونيك خاصه بالكت	MSC - 019	Folding of TDC Flange Ducts	05-1.2	China		WSY-1.5 X2050A	China	1	One Duct Per Minute
21	TDC Folding Machine	مكينة تفريج بعلق دبرونيك خاصه بالكت	MSC - 034	Folding of TDC Flange Ducts	05-1.2	China		WSY-1.5 X2050A	China	1	One Duct Per Minute
22	TDC Flange Machine	ماكينة عمل زوايا الجمع الخصبة بالكت	MSC - 020	Making of TDC Flange Profiles and TDC Cleats	05-1.2	China		T-12	China	1	One Duct Per Minute
23	TDC Flange Machine	ماكينة عمل زوايا الجمع الخصبة بالكت	MSC - 035	Making of TDC Flange Profiles and TDC Cleats	05-1.2	China		T-12	China	1	One Duct Per Minute
24	Cornematic Machine	ماكينة ثبيت زوايا الخطاف بالتصاص	MSC - 021	Insertion of TDC Corners, Into TDC Flange Ducts	05-1.2	China		CCI-S	China	1	30 Ducts Per Hour

CERTIFICATES

Approved Installer Certificate

This is to certify that

M.U. Al Samman Est.

PO Box 132934
Jeddah
Saudi Arabia

Is an Approved Fabricator and Installer of Firemac Gulf DMCC fire resistant ductwork systems, having met the requirements of certification for:

FIREMAC FM FIRE DUCTS
ONE TO FOUR HOUR FIRE RESISTANCE

Having completed training with a Firemac Gulf approved trainer on 27/03/16

Signed

Name:	David Roulstone
Position:	Operations Director
Company:	Firemac Gulf DMCC
Reference:	MUAS Firemac Approval
Issue Date:	28/03/16
Expiry Date:	27/03/18

Firemac Gulf DMCC, PO Box 336262, 3802-1, 38th Floor, Tower AA1, Mazaya Business Avenue, JLT, Dubai, United Arab Emirates
Tel: +971 (0) 4278 4703
Trading License Number: DMCC-070136
Registration Number: JLT4388

The image shows a formal document from the General Authority of Civil Aviation (GACA). It includes the GACA logo at the top right, the name of the authority in Arabic and English, and the name of the facility, 'المطارات الداخلية' (Domestic Airports), in Arabic and English. The document features several signatures in blue ink, including those of 'مدير عام هندسة المراقب' (Director General of Engineering) and 'مهندس المراقب' (Engineering Supervisor). A large, rectangular official stamp is also present, containing the GACA name in both languages, along with other administrative details like file numbers and dates.
